Graduation Requirements - Entering Fall 2008-09 and Thereafter

The Bibb County School District ("District") provides secondary school curriculum, instructional delivery, and support services that are informed by the high school graduation and assessment requirements established by the Georgia Department of Education that assist all students in preparing for postsecondary opportunities.

State graduation requirements for students are determined by State Board of Education Rules, which may vary depending on the school year the student enrolls in the ninth grade for the first time.

The Bibb County Board of Education ("Board") will require that students satisfy all state requirements, except for graduation provisions waived under the District's flexibility contract, and local graduation requirements set by the Board in order to earn a high school diploma. Students and their parents will be advised of the graduation requirements applicable to their graduating class through a guide prepared by the District and advisement materials as required by state law and the applicable State Board of Education graduation rule and guidance.

The Superintendent or his or her designee is authorized to develop any administrative regulations, guidelines, or procedures that may be needed to implement this policy.
