

CHRONOLOGY OF THE AGENDA ITEM

In anticipation of the end of E-SPLOST V and the start of E-SPLOST VI, Operations' staff started investigating PMIS software systems in late 2021/early 2022 that would be District owned and used by both District and E-SPLOST Program Manager staff. District staff evaluated PMIS software products from multiple vendors and selected Kahua due to its capabilities and ease of use.

At its May 8, 2023 meeting, the Board approved the initial one-year annual subscription with four (4) one-year renewal options.

The current request is for the **first of four one-year renewal options** for a not-to-exceed amount of \$376,000 and will allow for the continued use of the annual subscription for the Kahua Project Management Information System (PMIS) through **October 14, 2024**.
