

CHRONOLOGY OF THE AGENDA ITEM

The Operations Division was approached for an easement request from Georgia Power at the Former Atherton ES Site off Atherton Drive. The purpose of this project is to upgrade electric distribution facilities to improve electric service reliability to the DCSD site and surrounding neighbors. Overhead lines in the area may be more prone to outages caused by trees contacting lines or vehicular collisions. Removing any trees and other obstructions to the lines and equipment will aid in providing the area with quality service.

It is requested that the Board of Education approve the easement to Georgia Power to improve electric service reliability at the Former Atherton ES site.
