

CHRONOLOGY OF THE AGENDA ITEM

The construction project at the E. L. Miller ES site is moving forward. GA Power is the requesting the right to install and maintain electrical and communication lines to all existing facilities and future structure(s) within the Easement area. The easement request allows GA Power to construct, maintain, repair, rebuild the lines for transmitting electric current to the facility. The underground electric distribution lines are to be installed for the improvement of services to the facility. The renovations may include updates to transformers, manholes, wires, cables and other necessary fixtures and appliances.
