

Chronology: Wireless Maintenance Agreement

In 2019 Dekalb County School District (DCSD) issued RFP #20-516 to request proposals to supply and install Wireless Access Points for many of the 134 schools and administrative locations within DCSD on its Wide Area Network on an as needed basis. This agreement is essential to ensuring continuous coverage and support for the wireless network that facilitates the connectivity of devices used by students and staff. It also safeguards against potential hardware and software failures for over 8000 DCSD wireless access points, licenses, and supporting servers, which collectively offer a secure wireless network for all DCSD-issued devices.

Financial Impact:

| Year | Cost |
|-------------|---------------------|
| 2023 | \$335,055.40 |
| 2024 | \$201,495.36 |
| 2025 | \$128,000 requested |
