

## **Chronology Flat Panels**

In 2023 the district began a refresh project for interactive flat panels. RFP 18-16 Collaboration Presentation System to Virtucom, LLC was approved to support the purchase of the interactive flat panels in the amount of \$11,026,590.

The goal of the refresh project was to provide updated ViewSonic flat panels for teaching and learning environments to create collaborative lessons that motivate and support student engagement and improve test scores. The project was concluded in 2024 once all 4,050 panels had been installed.

DIIT is requesting that the Board of Education approve the purchase of district wide Viewsonic interactive panels and services from Virtucom and CDW-G to continue to support digital teaching and learning environments. The requested funds will be utilized for the relocation, storage of devices, deinstallation and reinstallation services due to renovations and HVAC installations.
