RE: MLK High School Auditorium Stage Floor

Ram Enterprises Inc. (REI) would like to offer the following proposal for the provision of a New Wood Stage Floor for the Auditorium. Our proposal is as follows:

We propose to furnish all materials, labor and equipment needed to cover the existing VCT flooring on the stage with 10 mil poly; attach the 1/2" resilient padding to the bottom side of the 3/4" CDX plywood and attach to the substrate with resiliency actuated pins; install an additional layer 3/4" CDX plywood using counter sink screws. We will skim all joints and visible screw heads and will then lightly sand all visible joints. After preparation of surface, we will apply 2 coats of water base seal to the new flooring and lightly sand the sealed flooring. We will then apply 2 coats of flat black paint; furnish and install new vented cove base and rubber reducer transitions where applicable.

We will complete the task listed above for a total sum of: **\$43,100.00**

Thank you for the opportunity and please feel free to call should you have any questions or if we may be of further assistance.

Respectfully,

David Goodwin
