**RE: MLK High School Classroom Room Competition Dance Floor**

Ram Enterprises Inc. (REI) would like to offer the following proposal for the provision of a New Connor Proforma III Competition Dance Floor assembly. Our proposal is as follows:

We propose to furnish all materials, labor and equipment needed to remove and dispose of the existing wood flooring system and prepare the surface to receive the New Connor Proforma III competition Dance Floor. We will furnish and install one layer of 10 mil poly over the entire substrate. Following the poly we will provide and install and anchor the resilient prefabricated sandwich subfloor panel system followed by the installation of one layer of 3/8" sheathing to the installed subfloor system. We will then install one layer of 1/2" sanded Birch plywood over 3/8" sheathing glued and screwed. The Birch plywood will be prepared by skimming all joints, screw heads and then sanded to accept a proper Marley type Vinyl Dance floor. The Vinyl floor shall be adhered to the prepared Birch panel and all side and head seams shall be heat welded. We will then provide and install new vented cove base and transitions as needed.

We will complete the task listed above for a total sum of: **\$79,580.00**

Thank you for the opportunity and please feel free to call should you have any questions or if we may be of further assistance.

Respectfully,

David Goodwin
