

Dunwoody High School

Restroom Trailer Details

No Cost to DCSD

May 2025

DHS Field Area – Restroom Problem

Current portable restrooms, two, are not suitable for adults, children, or teens while attending and participating in events at Dunwoody High School (DHS) athletic fields

Comments from community

- “If my grandchild is there, age 6, she won’t use it and neither will I”
- “They are dark and virtually unusable at night”
- “Unsanitary as people are unable to wash hands properly after using the restroom”
- “Difficult to use for elderly spectators. It is also difficult to for elderly to go up and down the stairs to use the restrooms in the building”
- “The building may or may not be locked at the gym during events. DHS community and and visiting schools have to guess what their level of restroom facilities/access may be”

DHS Field Area – Restroom Solution

- Dunwoody High School PTSO and Wildcat Fund purchase a portable restroom trailer that will sit near the football field
- Restroom trailer will have 3 total toilet/sink combinations – 2 standard and 1 ADA compliant
- Restroom trailer will have access to water and electricity from the Dunwoody High School building. Trailer has a 100 gallon fresh water tank and one 300 gallon waste tank
- Restroom trailer will be supplied and maintained by staff and community members of DHS
- Restroom trailer security will be the responsibility of DHS Security team

DHS Field Area – Restroom Key Points

- Restrooms do not require a financial commitment from Dekalb County School District (DCSD)
- Lakeside High School and Redan High School already have suitable outdoor restrooms on their campuses
- Restroom will not be installed, while we expect the unit to be stationary, it is a portable trailer
- Restroom will be the property of the Dunwoody High School Wildcat Fund
- Use of the restroom trailer is at the discretion of Dunwoody High School administration team/designated party
