

Our Mission

The Modern Classrooms Project empowers educators to meet every student's needs through:

- **Blended Instruction:** Learners access new content through teacher-created videos.
- **Self-Paced Structures:** Learners learn at their own paces within each unit of study.
- **Mastery-Based Learning:** Learners progress when they demonstrate mastery.

We lead a movement of educators in implementing a research-backed instructional model that leverages technology to improve educator effectiveness and learner understanding.

What We Do

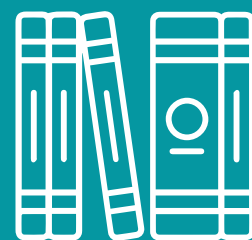

We empower any educator -- in any school, grade level, or content area -- to create a classroom where all students can learn. We offer educators:

- **Free Online Course:** A full introduction to our model, with exemplars, templates, and more.
- **Virtual Mentorship Program:** An innovative approach to personalized PD. Build your own Modern Classroom with the support of an expert mentor.
- **School & District Partnerships:** Transformational supports for school communities.
