Charter Schools

The Board of Public Education for Bibb County ("Board") seeks to authorize high quality charter schools. Pursuant to the State Board of Education Rule 160-4-9-.06, the Board provides control and management of local charter schools and authorizes the Superintendent to develop and enforce administrative regulations and procedures needed to ensure compliance with Federal, State, and local Board of Education requirements.

The Board grants locally approved charter schools autonomy in areas such as governance, instructional program implementation, personnel management, and budgeting. In return for this flexibility, charter schools are held accountable by the Board of Education for their performance in academics, operations, legal compliance, and board governance. The requirements for charter school accountability are specified in the charter contract and applicable state law. Charter schools are also required to operate in compliance with the Assurances and Required Statements as approved by the Board of Education.
