Solution Summary

This proposal is to install AiPhone IX series intercoms and add cameras to areas that have limited coverage, to all schools in the Bibb County School District. These areas were determined during site visits conducted by Bibb County School District (BCSD) and NextGen Security (NXG).

AiPhone

NextGen Security will replace all existing AiPhone intercoms systems located at the schools. NXG will provide all master desk stations, door stations, wire, Exacq Vision licenses, installation, programming and training. BCSD to provide locking hardware, power supply for lock, network switches/patch panels, network connection and power under the desk in main office and kitchen office. All the items BCSD are to provide currently exist. In the event any of the existing devices are determined to be deficient, it will result in a change order to replace.

NextGen Security will program the AiPhone intercom cameras to record on the local video surveillance server. BCSD to provide IP address for all intercoms.

Camera additions

NextGen Security will provide a complete installation new cameras in areas of limited/no coverage determined on walkthroughs with Matt Usry. NXG will provide all cameras, mounts, conduit, patch cables, installation, programming and training. NXG will then program the cameras into the BCSD ExacqVision Enterprise. BCSD to provide IP address for all cameras.
