REVISED VERSION

DeKalb County Board of Education desires to enhance the educational opportunities available to district students. Listed below are several options where students may be eligible to attend a school outside their attendance area. The district will publish written and/or electronic materials explaining each of these options annually.

Typically, a student is assigned to the school serving the geographic attendance area in which the student resides. A student's residence is defined in Policy JBC: School Admissions and attendance areas are discussed in Policy AD: School Attendance Zone. Both policies can be found on the district website.

Instances in which students may attend a school outside their attendance area are outlined below. Students who do not reside in the district are not eligible for enrollment in a district school, except as required by state law or as provided below.

A. Students Receiving Exceptional Education Services

In certain circumstances, students requiring exceptional education student services will be placed in a school other than the school serving their attendance area, in accordance with special education procedures.

B. Georgia Special Needs Scholarship Program

Qualifying students with an existing Individualized Education Program (IEP) or eligible Section 504 plan, as defined by State law and State Board rule, may attend another school within the district

if space is available and the school can provide the required services.

C. Limited School Choice

Students may enroll in schools outside of their attendance area where there is space available, based on the student's assigned grade level. Administrative transfers may also be offered when a neighborhood school reaches or exceeds its capacity, as outlined in Board Policy AD. A list of schools to which a student may transfer is publicized each year after the district determines seat availability. Siblings will only be approved if there is space available in the requested grade level.

D. Other School Choice Programs

The district offers several academic options, including charter schools, magnet programs, and theme schools. These options are referred to as school choice programs. Available school choice programs and relevant admissions criteria are published yearly. Every eligible student must follow the published criteria and process.

The board, upon recommendation by the superintendent, may move a school choice to a different facility or cease the operation of a school choice program.

E. Sibling preference

1. Siblings are defined as two or more children having one or more birth parents or legal guardians in common.
2. The district may provide sibling preference in school choice programs, subject to capacity, program eligibility, lottery procedures, and administrative regulations approved by the Superintendent.
3. Siblings are not required to participate in the same program; however, they must attend the same school.
4. Current siblings must be enrolled and continue attendance at the same school during the upcoming academic year.

5. Upon completion of the program, all students are required to return to their designated home school or apply for admission into another approved program.
6. All siblings must meet the established criteria for the specific program to which they are applying.
7. Multiple birth siblings applying concurrently to the same school will be entered into the lottery and processed or waitlisted simultaneously, contingent upon seat availability.

F. Enrollment Options for Children of Full Time Employees

The following provisions apply only to a child whose custodial parent or legal guardian is a full-time employee of the district. A child whose custodial parent or legal guardian is a full-time employee of the district is allowed to attend the school where the parent or legal guardian is employed or within the vertical feeder pattern of the school where the parent or legal guardian is employed, subject to available capacity, program eligibility, service availability, and administrative procedures. Central office employees' children may attend a school located in the vertical feeder pattern of the employee's work site. Payment of tuition will not be required even if the employee and child reside in another school district.

G. Hardship Transfers

In exceptional circumstances, and on a case-by-case basis, hardship transfer requests will be considered. Upon receiving documentation of an extenuating situation, the superintendent or the superintendent's designee may approve a recommendation by the Office of Student Assignment to allow a student to attend a school other than the school serving the student's attendance area. State law allows for transfer requests in certain circumstances based on placement in a non-permanent classroom or excessive travel time or distance. Available capacity in the requested school and grade level at the time of the request will be considered for all hardship transfer requests. If capacity is not available, the

superintendent may approve a transfer to another school in the district. Siblings may be approved only if grade-level capacity is available. Hardship transfers are limited to district residents.

H. Unsafe School Choice Option

A student who is the victim of a violent criminal offense, as defined by state law, while on the grounds of the school that the student attends, may transfer to another school within ten school days of the offense.

Federal law also allows transfers out of schools that are designated by Georgia as unsafe. Information regarding unsafe schools can be found on the Georgia Department of Education website.

I. Seniors Moving out of the District or into another District school

A current or rising senior at a district school who moves out of the district may complete their senior year at the district school most recently attended if the student furnishes transportation, abides by district-approved standards of behavior, maintains regular attendance, arrives and departs on time, and pays tuition as outlined in Policy JBCBA: Tuition, which is available on the district website. A current or rising senior at a district school who moves out of the school's attendance area may complete their senior year at the student's most recently attended district school if the student furnishes transportation, abides by district-approved standards of behavior, maintains regular attendance, and arrives and departs on time.

J. Superintendent Responsibilities

The Superintendent will provide an annual student assignment data report. The Superintendent is authorized to develop administrative regulations and procedures to implement this policy.
