Recovery Analysis of COVID-19 on Public School Units, Students and Families

Presentation to the NC State Board of Education at the May 2023 Planning and Work Session

Andrew Smith, Ed.D., Assistant Superintendent
Jeni Corn, Ph.D., Director of Research and Evaluation

OLR Spring 2023 Evidenced-Based Strategic Planning Regional Sessions

Purpose of Regional Sessions

- Help PSUs identify their priorities for recovery and acceleration based on their data to use as part of local strategic plans and identify interventions to address those priorities.
- Participant Outcomes:
  - ✔ increase awareness of new data sources and better understand impacts of the pandemic for different student groups
  - ✔ increase understand of how data and research can guide local strategic investments in interventions to address priorities
  - ✔ build relationships with DPI and other PSU staff

Agenda for Regional Sessions

- Setting Vision and Direction
- Getting to Know You
- Reviewing Statewide and Regional Data
- Exploring Local Data and Identifying Priorities
- Modeling the Use of Strategic Planning Tools
- Putting Data Into Practice
- Reflecting Together

Demonstration/Activity

- Identify at least one student group from the data most negatively impacted - note the negative effect size.
- Find research-based intervention at several clearinghouses for vetted resources:
  - NCDPI Promising Practices Clearinghouse
  - IES What Works Clearinghouse
  - USED Recovery Resources

What did PSUs receive?

Data Sources: Impacts of Pandemic, National Student Clearinghouse, Employment Outcome Dashboard, myFutureNC County Profiles

- Overview of state and regional data results
- Aggregated data files based on their LEA and schools
- Documentation and supports on how to interpret results
- Recommended clearinghouses of vetted resources

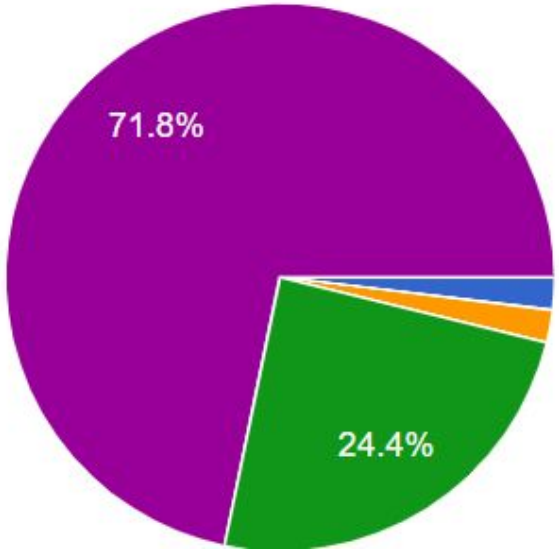
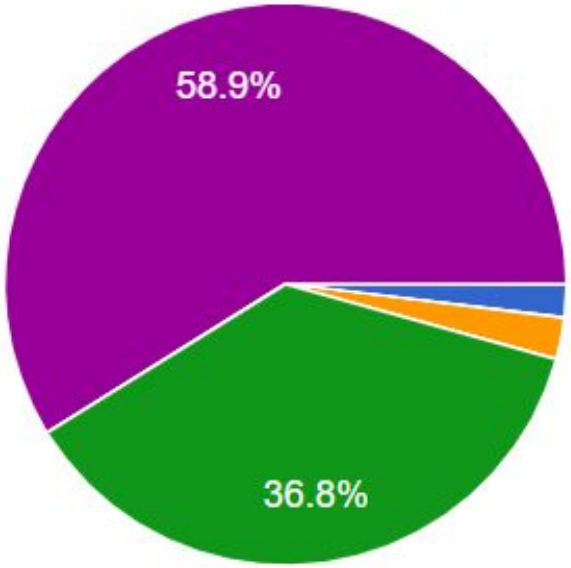
Feedback from Regional Sessions

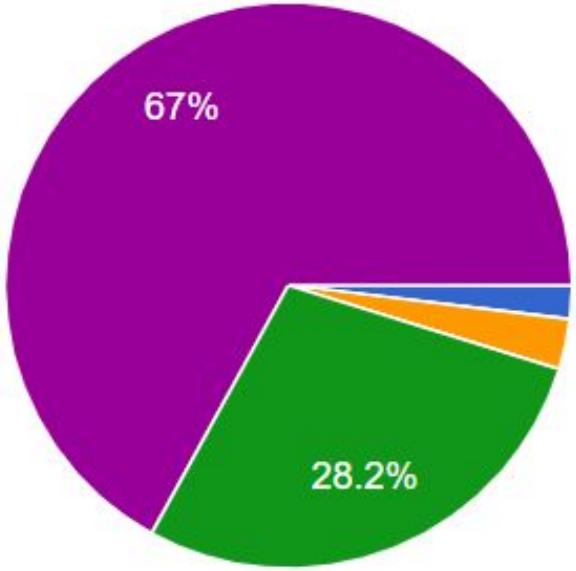
Provided important resources



Will assist in decision-making



Gained new information and skills



~350 district personnel and ~30 DPI staff participated in 8 regional sessions between Feb 20-March 29

Feedback from Regional Sessions

Most Useful

"Time with colleagues to look at data, particularly the recovery analysis data."

"I enjoyed having time with my team to dive into the data while having experts on-hand."

"The structure of the meeting that provide us an opportunity to digest and discuss data sets before being presented the next set."

Suggestions

"Would love more time to discuss data sets and make a plan for implementation. This could have been a full day session. :)"

"We need many more opportunities for data review to support us. It was great information but way too much to process at once."

Recovery Analysis of COVID-19 on Public School Units, Students and Families - EVAAS Team at SAS (ESSER II, ESSER III)

Full Report Available on NCDPI's Research & Recovery Roundup

#MakeYourDataWork

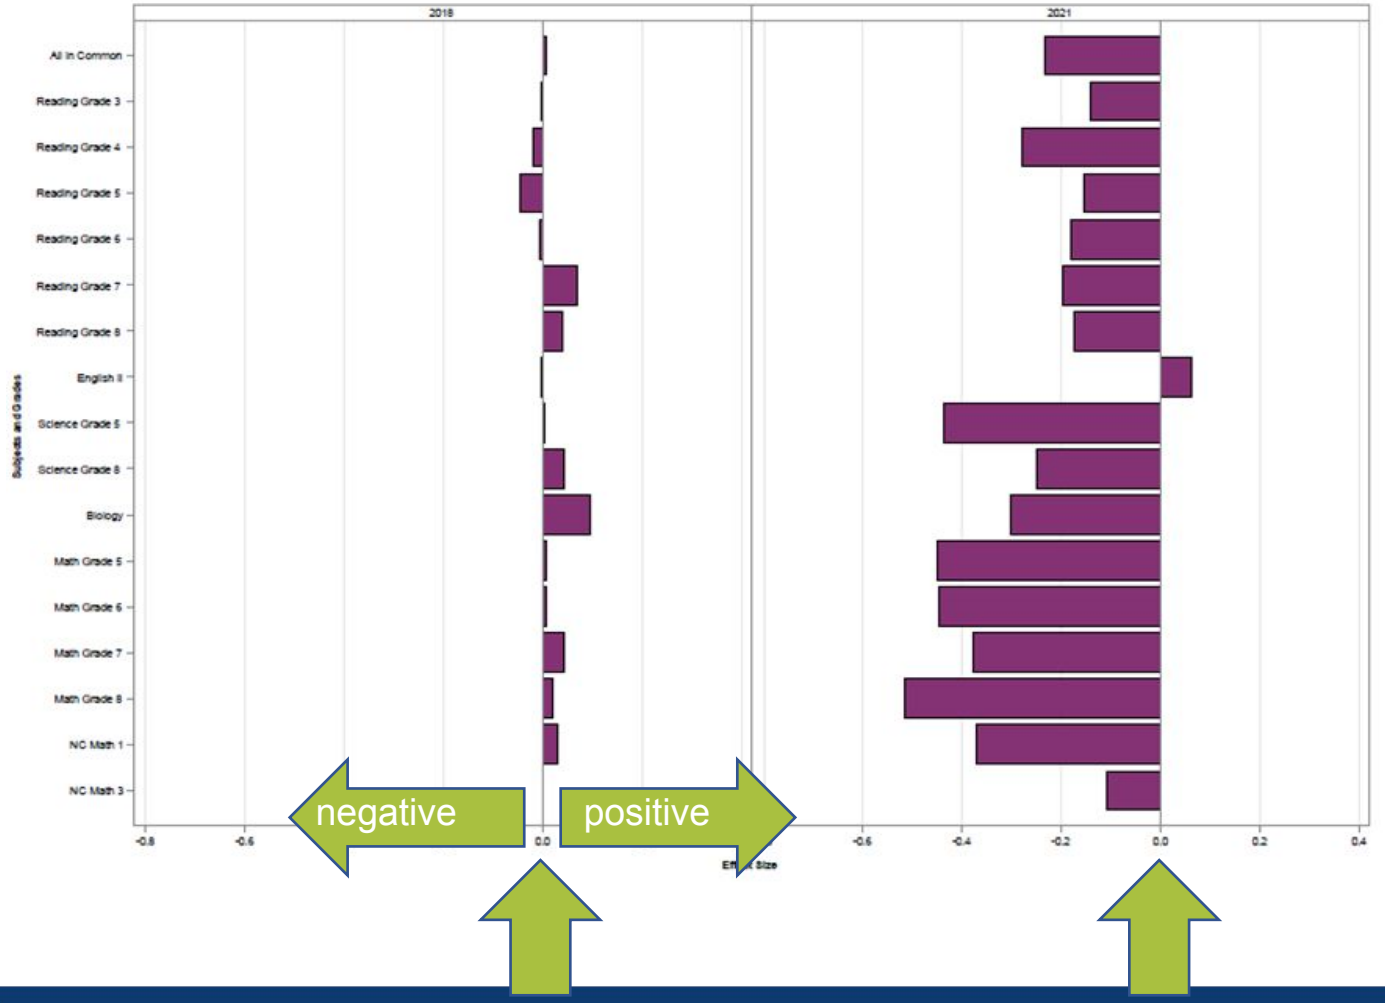
"Data is not about adding more to your plate. Data is about making sure you have the right things on your plate."

~Paul Fleming, Education Scotland

Wrapping Up 2020-21 *Lost Instructional Time* Report

- Technical Report Submitted to JLEOC December 15 (link)
- Releasing a series of white papers focused on:
  - New data added for Science Grade 5 and ACT
  - New interactions including gender, region, race, urbanicity, student groups (i.e., AIG, SWD, EDS, ML)
  - New findings related to:
    - Teacher and principal effectiveness and longevity (link)
    - Chronic absenteeism

Wrapping Up 2020-21 *Lost Instructional Time* Report



Framing the 2021-22 *Recovery Analysis* Results

- This data is unique to North Carolina as it is individual, student level data (~1.4M students) and not based on sample sizes which means all differences are *statistically* significant.
- This data goes beyond how many students met grade level proficiency and presents the difference between where we expected students to perform and how they actually performed.
  - 2018 provides a reference for "business as usual”
  - Effect size graphs compare 2021 and 2022 to provide an estimate of "magnitude of recovery"
  - Vertical 0 line means students in those groups are performing as we would expect. They are on track based on past performance.

Main Effects for Student Groups

- Summary of All Tested Subjects
- Sex
- Race/Ethnicity
- Economically Disadvantaged Students
- Chronically Absent
- Academically or Intellectually Gifted
- Students with Disabilities
- Multilingual Learners
- Student Experiencing Homelessness
- Military Connected
- Foster Students
- Migrant Students
- Entering Achievement by Quintile
- Urbanicity
- Percentage Connectivity
- 2021 Remote Days by Quintile

Interactions and School Type

- Race/Ethnicity Split by Sex
- Race/Ethnicity Split by Urbanicity
- Race/Ethnicity Split by AIG
- Sex and EDS Split by Race/Ethnicity
- Urbanicity Split by EDS
- Urbanicity Split by AIG
- Urbanicity Split by Multilingual Learners
- Urbanicity Split by Students with Disabilities
- Student Remote Split by Race/Ethnicity
- State Board of Education Region
- Race/Ethnicity Split by SBE Region
- Urbanicity Split by SBE Region and Economically Disadvantaged
- School Designation
- A-F Grade

Understanding Effect Sizes

- Standardized metric that indicates magnitude or practical significance of a research outcome. A large effect size means that a research finding has practical significance, while a small effect size indicates limited practical applications.
- How to interpret:
  - Small: Effect size less than 0.05
  - Medium: Effect size ranges from 0.05 to 0.20
  - Large: Effect size greater than 0.20*
- Effect size can be positive or negative

*Kraft MA. “Interpreting Effect Sizes of Education Interventions.” *Educational Researcher*. 2020; 49 (4):241-253.

- Olivia Oxendine, Patrick Greene, Derrick Jordan

Small Group Activity and Discussion

Goal II-Improve school and district performance by 2027.

- Objective 2-Increase the percentage of **grades 3-8 math and ELA EOG subgroup** test scores meeting the ESSA Yearly Measures of Interim Progress.
- Objective 3-Increase the percentage of students proficient in **math by subgroup.**
- Objective 4-Increase the percentage of students proficient in **reading by the end of 3rd grade.**
- Objective 5-Increase the percentage of **high school reading subgroup** test scores meeting the ESSA Yearly Measures of Interim Progress.
- Objective 6-Increase the percentage of students **proficient in science** by subgroup

Small Group Activity and Discussion

- As a team, select an Objective and group(s) for focus
- Review data on your own (See Report Excerpt)
- Discuss
  - What data points encouraged you?
  - What data points concerned you?
  - What was surprising?
  - Which students need the most support?
- Share out

Small Group Activity and Discussion

By Student Group

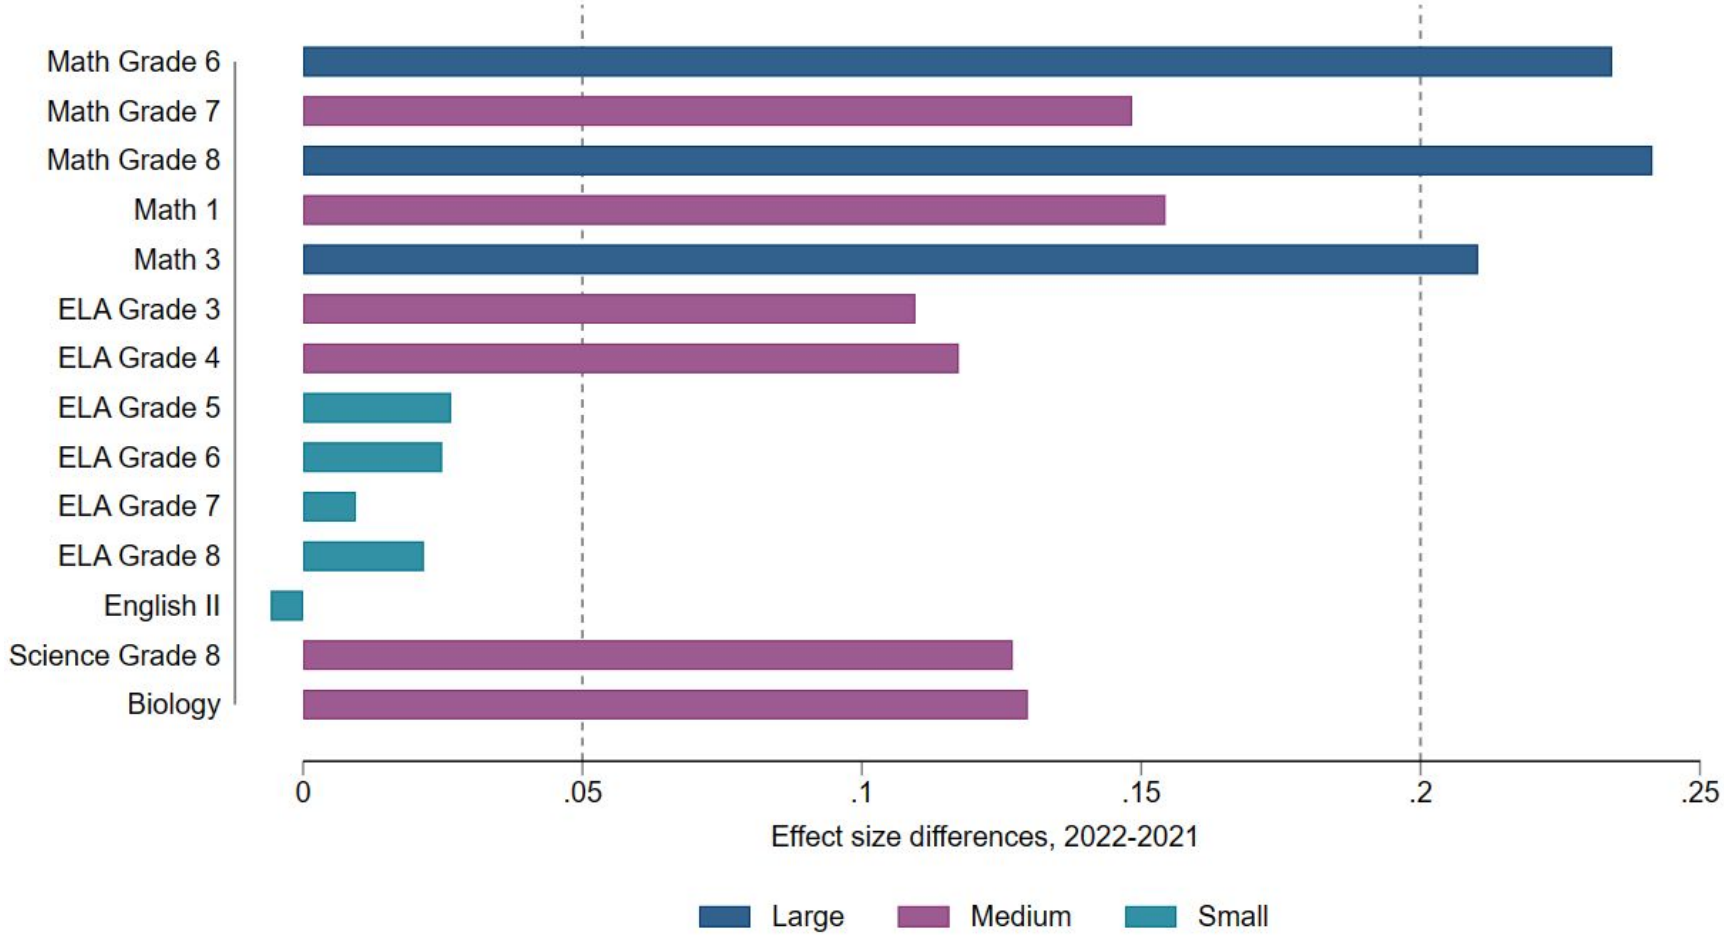
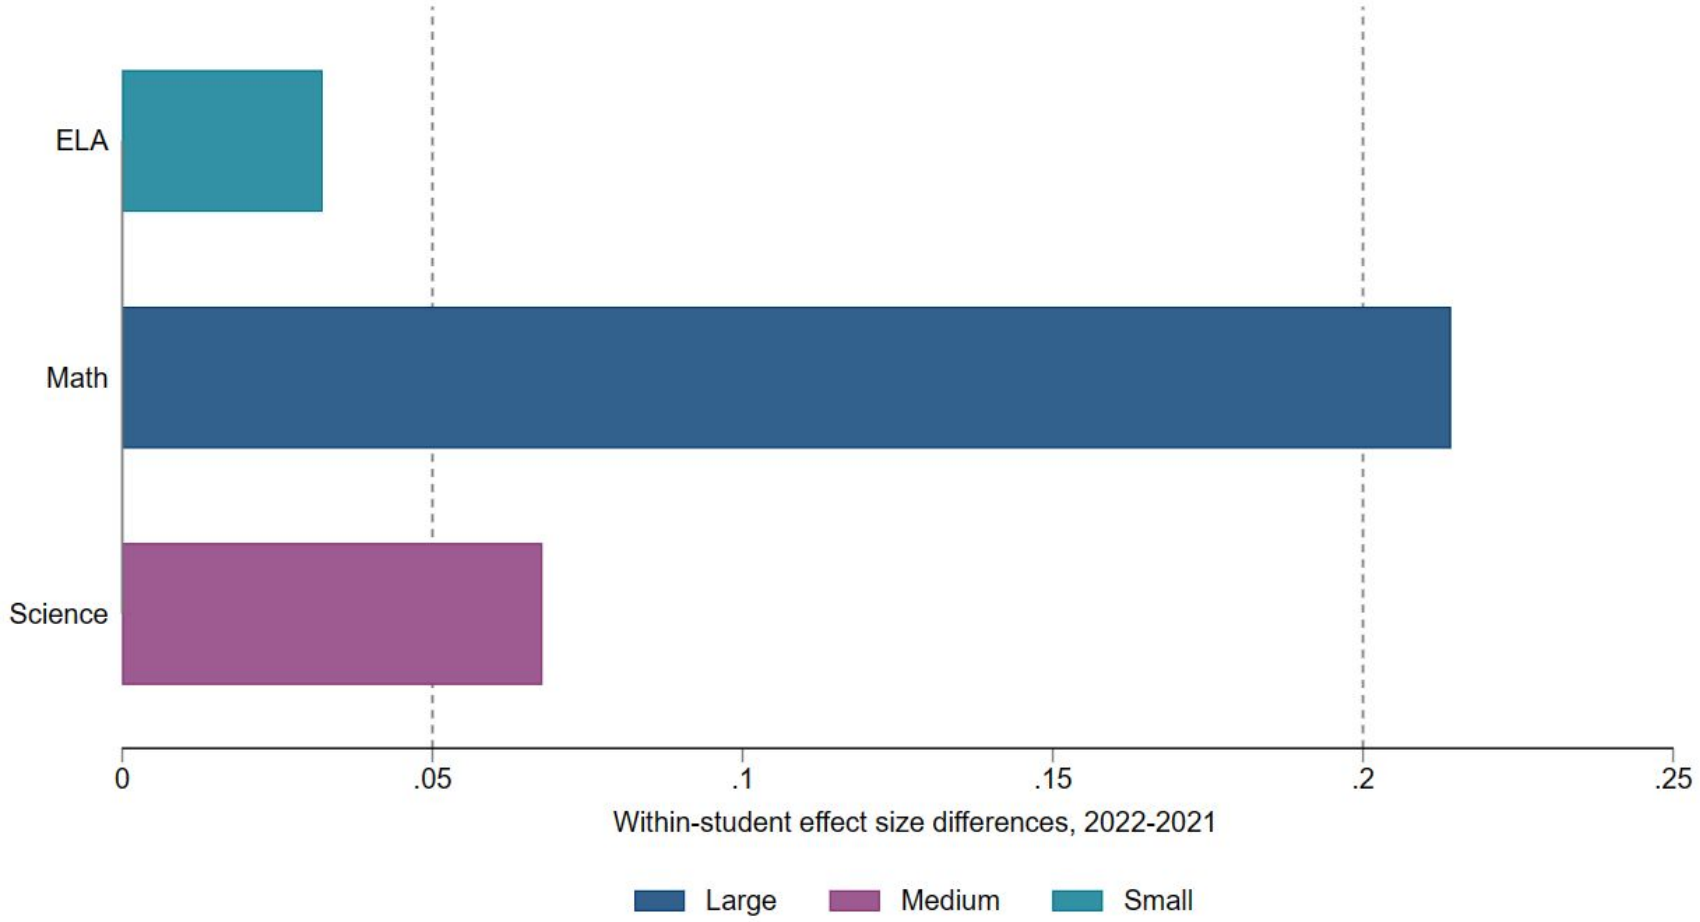
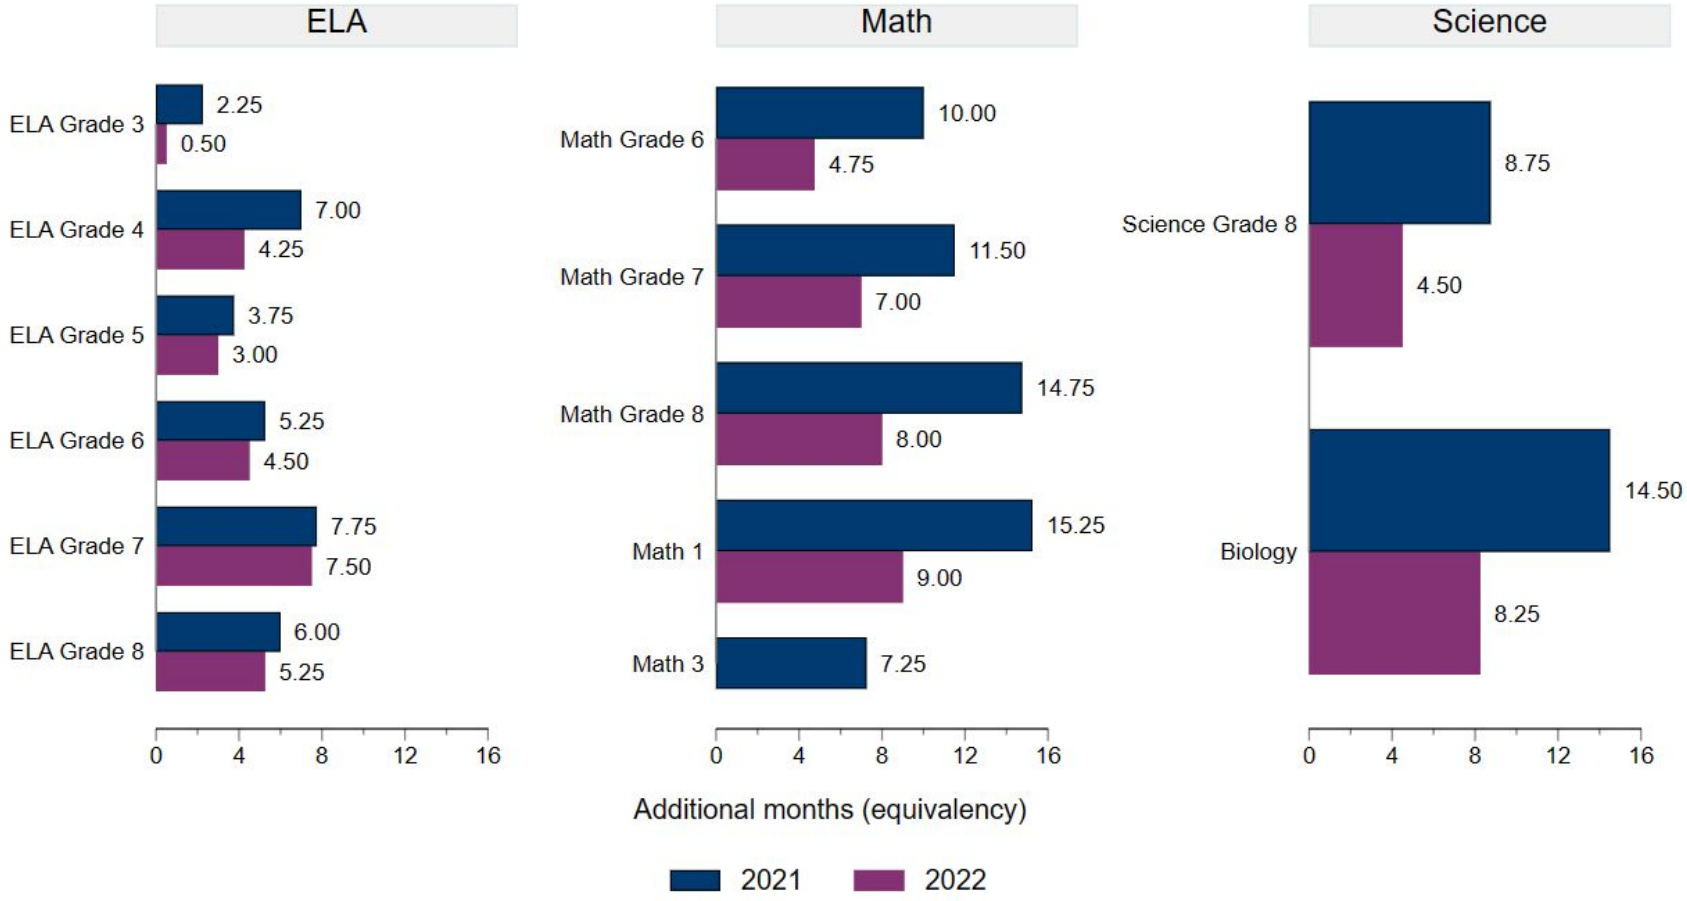
2021-2022 "Magnitude of Recovery"



2021-2022 "Magnitude of Recovery"



2021-22 Recovery Analysis: “Months”



Small Group Activity and Discussion

- Discuss with your small group
  - What are policy solutions to these issues? What interventions might be working?
  - What other data do we need? What needs to be studied?
  - How will this inform your conversations/decisions as a Board?
- Share out

Thank you
