The Finance team met with the Auditors on May 19th and reviewed the draft copy of the FY24 financials statements. The auditors had a few outstanding items for the team, most have since been provided with the remaining items estimated to be complete within the next week.

The team continues to work through FY26 cash reconciliations. Once these have been brought to current, the monthly processing will be transferred from the Controller and Assistant Controller to members of the finance staff. The goal of the team is to have reconciliations current prior to starting FY 25 audit workpapers in June, and we are on good track for that plan.
