

Public Schools of North Carolina
State Board of Education
Department of Public Instruction

Report to the North Carolina General Assembly

2016-2017 State of the Teaching Profession in North Carolina

General Statute § 115C-12(22)

Due Date: February 15, 2018
Report # 70
DPI Chronological Schedule, 2016-17

STATE BOARD OF EDUCATION

SBE VISION: Every public school student will graduate ready for post-secondary education and work, prepared to be a globally engaged and productive citizen.

SBE MISSION: The State Board of Education will use constitutional authority to lead and uphold the system of public education in North Carolina.

WILLIAM COBEY

Chair :: Chapel Hill – At-Large

BECKY TAYLOR

Greenville – Northeast Region

TODD CHASTEEN

Blowing Rock – Northwest Region

A.L. COLLINS

Vice Chair :: Kernersville – Piedmont Triad Region

REGINALD KENAN

Rose Hill – Southeast Region

WAYNE MCDEVITT

Asheville – Western Region

DAN FOREST

Lieutenant Governor :: Raleigh – Ex Officio

AMY WHITE

Garner – North Central Region

ERIC DAVIS

Charlotte – At-Large

DALE R. FOLWELL

State Treasurer :: Raleigh – Ex Officio

OLIVIA OXENDINE

Lumberton – Sandhills Region

PATRICIA N. WILLOUGHBY

Raleigh – At-Large

MARK R. JOHNSON

Secretary to the Board :: Raleigh

GREG ALCORN

Salisbury – Southwest Region

NC DEPARTMENT OF PUBLIC INSTRUCTION

Mark R. Johnson, State Superintendent

301 N. Wilmington Street :: Raleigh, North Carolina 27601-2825

In compliance with federal law, the NC Department of Public Instruction administers all state-operated educational programs, employment activities and admissions without discrimination because of race, religion, national or ethnic origin, color, age, military service, disability, or gender, except where exemption is appropriate and allowed by law.

Inquiries or complaints regarding discrimination issues should be directed to:

Dr. Maria Pitre-Martin, Deputy State Superintendent

6368 Mail Service Center, Raleigh, NC 27699-6368 :: Telephone: (919) 807-3200 :: Fax: (919) 807-3388

2016-2017
Annual Report on the State of the Teaching Profession in North Carolina

Overview of the Annual Report

GS §115C-12(22) requires the State Board of Education to include specific data in its annual report on the teaching profession.

Attrition data within this report are summarized in multiple ways: by individual local education agencies (LEA) and by the new State Board of Education (SBE) Districts. Improvements were made to this report last year based on feedback from the NC Department of Public Instruction and the State Board of Education. The five summary categories were realigned to better represent the reasons teachers have self-reported their change in employment. Additionally, the North Carolina Department of Public Instruction (NCDPI) has eliminated the use of the term "Turnover" from this report and will use, and define, the terms "attrition" and "mobility" to describe changes in teacher employment status. For the purposes of this report, the following definitions apply:

Attrition: a reduction in the number of employees that occurs when employees leave an employing unit. Attrition can be measured at the state or LEA level.

Mobility: the relocation of an employee from one LEA/charter school to another within the state of North Carolina. For the purposes of this report, mobility only exists at the state level; employee mobility across LEAs/charter schools is considered to be attrition for the employing unit from which the employee departs.

Given the change in how NCDPI is defining employment trends in this report, results from the 2015-2016 and 2016-2017 reports cannot be compared to prior year reports in a meaningful way. Differences in employment trends between the 2015-2016 and 2016-2017 reports and prior years are not comparable and should not be attributed to any programs or policies implemented in prior years.

Data Collection Procedures

Every Local Education Agency (LEA) reports teacher turnover to the state yearly. These data are used in calculations to satisfy state legislation as well as the NC School Report Card (SRC). Calculations are based on a snapshot of employment for classroom teachers employed in the LEA as reflected in the DPI payroll database. Classroom Teachers are determined by Purpose Codes beginning with 51, 52, or 53 and Object Codes 121, 123, 124, or 128. Purpose and Object Codes are part of the payroll budget code. To determine attrition, the teacher's Unique Identifier (UID) is queried against all employee budget codes in the previous year's payroll data file. If a teacher's UID is not found to be employed in the state in March of the current year as they were in March of the previous, the teacher is classified as attrition at the state level. If a teacher's UID is found to be employed in the state in March of the current year but in a different LEA from the prior year, that teacher is classified as attrition at the LEA level, but mobility at the state level. Teachers who remain in the same LEA but move from an instructional to non-instructional role within the measurement period do not contribute to the attrition or mobility rate at the state or local level.

The Financial and Business Services Division at the Department of Public Instruction provides each LEA a list of individuals employed as teachers within the March date range, and they are asked to provide summary data on the reasons teachers leave the profession. These reasons are self-reported by teachers to LEA personnel during exit interviews, surveys, and/or factual information from their human resources database.

Charter school data are not reflected in this report except where teachers in an LEA in March 2016 moved to a charter school in March 2017 (identified as mobility in state-level reporting). Charter schools do not report attrition data to the State as teachers employed by NC charters are at-will employees and only 50% of their staffs are required to hold teacher licenses, according to GS §115C-238.29F(e)(1).

This report does not include teachers who moved from one school to another school within the LEA or teachers who are on approved leave; they continue as active and current employees. This report does not include information regarding local vacancies or any statewide salary/cost analysis.

There are **28 reasons** LEAs use to code their attrition data. For purposes of this report, those self-reported reasons are combined into **five (5) summary categories**. The five (5) summary categories were established to organize the data, to make comparisons of the data, and to find relationships among the data to better understand the reasons why teachers leave the profession. The categories are as follows:

- 1) Teachers who left the LEA but remained in education
- 2) Teachers who left the LEA for personal reasons
- 3) Teachers who were terminated by the LEA
- 4) Teachers who left the LEA for reasons beyond the LEA's control
- 5) Teachers who left the LEA for other reasons not listed above

From the perspective of the LEAs, all 5 summary categories represent attrition (loss of an employee from the LEA). From the perspective of the state, however, only summary categories 2-5 represent attrition from the state. Summary category 1, "Remained In Education" represents mobility within the State of North Carolina. The summary category, "Remained In Education" is excluded from the analysis on state attrition, but is analyzed in the section related to teacher mobility in the state.

Note: Teachers on approved leave and teachers who moved from one school to another school within the LEA are not captured in the state report at this time. Calculations include Visiting International Faculty (VIF) teachers who are required to return to their home countries after three years, Teach for America (TFA) teachers who are high-achieving recent college graduates and professionals enlisted to teach for at least two years in designated high-need communities, and teachers receiving financial assistance through the Troops to Teachers Program who agree to teach in their position for at least three years.

State of the Teaching Profession in North Carolina

Key Findings

1. Generally, North Carolina teachers are remaining in the classroom. The overall state attrition rate for 2016-2017 is 8.65%.
2. There were 94,792 teachers employed in NC between March 2016 and March 2017. Of these teachers, 8,201 are no longer employed in NC public schools (including those not teaching in public charter schools).
3. Teachers with fewer than three years of teaching experience are considered Beginning Teachers in NC. During the period between March 2016 and March 2017, there were 21,276 Beginning Teachers (BTs) employed statewide and 2,597 were reported as attrition. The attrition rate for Beginning Teachers in NC is 12.21%, substantially higher than the attrition rate for those not classified as a Beginning Teacher ($5,549/73,337 \approx 7.57\%$).
4. 4,643 Lateral entry (LE) teachers were employed, and, of those, 713 (15.36%) were no longer employed in NC public schools in March 2017. A total of 943 teachers were employed in North Carolina as Visiting International Faculty (VIF) teachers, and 162 (17.18%) of those teachers left employment with NC public schools; a total of 422 Teach for America (TFA) Teachers were employed in March 2016, and 139 (32.94%) were no longer employed in NC public schools in March 2017. (see Table 1)
5. The majority (53.6%) of teachers who left employment in NC public schools cited "Personal Reasons" for their decision to depart. Retirement with full benefits and family relocation were the largest individual reasons (18.7% and 12.3%, respectively) cited for teachers' decision to leave employment in NC public schools. (see Table 2)
6. On average, teachers who leave employment with the state have lower teaching effectiveness (as measured by EVAAS index scores) than their counterparts who remain employed in NC public schools. This relationship holds true when departing teachers are compared with remaining teachers in terms of years of teaching experience. (see Table 3 and Charts 2 & 3)
7. LEAs experience attrition as the combined effect of teacher attrition from the state and mobility of teachers from one LEA to another LEA/charter school. On average, 4.80% of the state's teaching force changed employment during the measurement period. The combined effect, or LEA-attrition rate for the state is 13.45% (8.65% state attrition rate + 4.80% mobility rate). There is a wide range of LEA-attrition rates across the state. (See Table 8)
8. Some LEAs are able to recapture their losses due to teacher attrition by capitalizing on teacher mobility. The rate at which LEAs are able to attract transferring teachers to their system is defined as the "recoupment rate". The LEAs with the highest and lowest recoupment rates are listed in Table 9.
9. Hard to Staff subject areas are determined by teacher vacancy reports submitted by the LEAs. For elementary schools, core subject teaching positions exhibit the highest vacancy totals. In middle schools (6-8) and high schools (9-12) LEAs have the highest vacancies in teaching positions for mathematics. (See Tables 11 and 12)

State Attrition Rates for NC Teachers

All 115 LEAs reported their district-level employment data this year. The calculations show that out of the 94,792 teachers employed during the 2015-2016 school year, 8,201 teachers were reported as attrition (i.e., no longer working in a North Carolina public school), resulting in an overall state attrition rate of 8.65%. This state-level attrition rate is slightly less than the attrition rate of the 2015-2016 reporting year of 9.04%. Generally, teachers in North Carolina are remaining in the classroom.

The state attrition rates for certain subgroups of teachers differ from those of experienced, licensed teachers. The state attrition rate for Beginning Teachers (fewer than three years of teaching experience) is approximately 61% higher for beginning teachers than for their more experienced counterparts (12.21% BT vs. 7.57% for non-BTs). Beginning Teachers account for approximately 30% (31.7%) of all teachers who separate from employment in NC public schools. The attrition rates for these teacher subgroups are presented in Table 1.

Teachers who enter the teaching profession on a lateral entry license are a subgroup of the teaching population whose attrition rates differ dramatically from the general population of licensed, experienced teachers. While there are many lateral entry teachers who are classified as a BT, there is a substantial number of lateral entry teachers who do not enter the profession as BTs (i.e., the lateral entry teacher is awarded greater than three years of teaching experience at licensure). Of the 4,643 lateral entry teachers who were employed in NC public schools in March 2016, 713 of them were not employed in NC public schools in March 2017, resulting in a state attrition rate of 15.36%. The state attrition rate for non-lateral entry teachers was 8.31%. Lateral entry teachers have, on average, an 85% higher rate of attrition than their non-lateral entry counterparts. As more and more teachers enter the profession through the lateral entry program, the higher-than-average attrition rates among this population of teachers warrants deeper investigation into the root causes of this phenomenon.

Other subgroups of the teaching population of interest are Visiting International Faculty (VIF) and Teach for America (TFA)¹ teachers. A total of 943 VIF teachers were employed in NC in March 2016, and 134 of those (17.18%) were not employed in NC public schools in March 2017. Of the 422 TFA teachers in NC in March 2016, 139 (32.94%) did not remain in employment in March 2017. These two subgroups of teachers do have a unique employment situation among NC teachers. In general, VIF and TFA teachers commit to a three-year or two-year contract, respectively, with NC school systems. While some teachers from these two groups do remain in education after the term of their initial contract, including attrition rates for those in the third year of their contract in March 2016 may skew the attrition rates higher. If one restricts the analysis to VIF and TFA teachers who did not cite the end of their contract term as their reason for leaving employment, VIF teachers have a 7.83% attrition rate and TFA teachers have a 15.81% attrition rate.

¹ For the purposes of this report, TFA teachers are defined as those on an initial, TFA license. Once a TFA teacher converts to a continuing license, the teacher is no longer identified as a TFA teacher.

Table 1: State Attrition Rates by Teacher Category 2016-2017

CATEGORY OF TEACHERS		Total Number of Teachers in Category 2016-2017	Number of Teachers Leaving Employment in NC public schools	% Attrition in Category 2016-2017
Experienced, Licensed Teachers		73,337	5,549	7.57%
Beginning Teachers ²		21,276	2,597	12.21%
Teach for America Teachers	All	422	139	32.94%
	Before Contract Term	329	52	15.81%
VIF Teachers	All	943	162	17.18%
	Before Contract Term	843	66	7.83%
Lateral Entry Teachers		4,643	713	15.36%

Reason Codes for Teacher Attrition

There are 23 reasons LEAs use to code their attrition data. For purposes of this report, the self-reported reasons teachers leave have been categorized into five summary categories: Personal Reasons, Initiated by LEA, Beyond LEA Control, Other Reasons. Some teachers reported in their exit interview that they intended to remain in education but move to a different LEA (either in a teaching or non-teaching role). Despite that assertion, some of these teachers were not employed in an NC public school in March 2017. These teachers contribute to the state attrition rate, and the original, self-reported reason code is changed to "Other Reasons". Alternatively, some teachers reported in their exit interview that they would leave employment in NC public schools, but were employed in an LEA or charter school in the 2017-18 school year. These teachers' reason codes were changed from the reported reason code to either "Resigned to teach in another NC public school system" (code 58), or "Resigned to teach in a NC charter school" (code 70).

As reflected in Table 2, teachers reported "Personal Reasons" as the main reason (53.6%) for their decision to leave the profession this year (2016-2017). Of those citing personal reasons for leaving employment as an NC public school teacher, the most common reason for leaving was relocation of the family (22.9% of teachers leaving for Personal Reasons). The number of teachers resigning due to retirement with full benefits has declined slightly in the 2016-2017 reporting year. Of the 8,201 teachers who left employment with NC public schools, 1,533, or 18.7%, left due to retiring with full benefits. Approximately one-fifth (19.8%), or 1,710 teachers, of the state's teaching force left employment with NC public schools due to retirement with full benefits in the 2016-2017 reporting year. Even so, retirement with full benefits represents the largest, individual reason for leaving employment with NC public schools from March 2016 to March 2017.

While the state may not be able to develop policy to address some of the reasons teachers supplied under the Personal Reasons category (e.g., health issues, family relocation, etc.), there are two reasons that might have root causes that could be addressed through policy. Nearly one in ten teachers (9.4%) who left employment with NC public schools indicated that they intended to teach in another state.

The second, policy-relevant reason that teachers gave for leaving NC public schools was a desire to pursue a different career. Again, almost half the teachers (44.48%) who cited this reason for leaving employment in the state's public schools were in the first five years of teaching.

² *Note: Beginning Teachers, VIF, TFA, and Lateral Entry teachers may be included in multiple categories.

The data displayed in Chart 1 show the attrition rates for teacher by years of experience. From the chart, one can see that attrition rates in the first five years of teaching are much higher than those of mid-career teachers (except for those teachers at 28 years and above who are eligible for retirement).

This attrition among early-career teachers could be attributable to differences in how younger generations view careers – younger professionals may be more fluid in how they approach their professional lives than earlier generations.

The state did target early-career teachers for salary increases in 2015. The fact that these teachers leave the teaching profession at higher rates than their more experienced counterparts is well documented, and increasing the salaries of early-career teachers could very well stem the high rates of attrition from the profession. It would be prudent, however, for the state to monitor the effect of this salary increase on early-career teachers' decisions to remain employed in NC public schools. If attrition rates among this group of teachers do not respond to the increased salary, the state could benefit from probing deeper into these teachers' motivations for pursuing their teaching careers in other states or leaving the profession altogether.

A complete list of reason codes for attrition from the state can be found in Appendix A. The percentage of reason codes cited by departing teachers by LEA can be found in Appendix B.

DRAFT

**Table 2: State Attrition Reasons by Categories
2016-2017**

For purposes of this report, the 23 self-reported reasons teachers provide to their LEAs are combined into four (4) summary categories below. The four (4) summary categories include the 23 self-reported reasons for leaving. The categories were established to organize the data, to make comparisons of the data, and to find relationships among the data to better understand the reasons teachers leave the profession.

Reasons for Attrition	2016-2017	
	Number	Percentage of Total Attrition
Overall State Attrition	8,201	
Personal Reasons	4,393	53.6%
Resigned due to family responsibilities/ childcare (57)	604	7.4%
Resigned to continue education/sabbatical (60)	234	2.9%
Resigned due to family relocation (61)	1,006	12.3%
Resigned to teach in another state (62)	767	9.4%
Dissatisfied with teaching (63)	140	1.7%
Resigned due to career change (72)	865	10.6%
Resigned due to health/disability (64)	173	2.1%
Retired with reduced benefits (68)	510	6.2%
Re-employed retired teacher resigned (73)	94	1.2%
Initiated by LEA³	638	7.8%
Dismissed (50)	21	0.3%
Non-renewal (probationary contract ended) (53)	125	1.5%
Interim contract ended--not rehired (54)	254	3.1%
Resigned in lieu of dismissal (55)	109	1.3%
Resigned in lieu of non-renewal (78)	53	0.7%
Did not obtain or maintain license (56)	76	0.9%
Beyond Control of LEA	1,916	23.4%
Reduction in Force (51)	16	0.2%
Retired with full benefits (66)	1,533	18.7%
Deceased (67)	65	0.8%
End of Term (VIF) (74)	99	1.2%
End of Term (TFA) (77)	91	1.1%
Resigned due to movement required by Military Orders (76)	112	1.4%
Other Reasons	1,254	15.3%
Resigned for other reasons (65)	305	3.7%
Resigned for unknown reasons (69) ⁴	949	11.8%
	8,201	100.0%

³ 832 teachers left their positions due to actions initiated by their LEA. Of these teachers, 638 (76.7%) did not return to employment in NC for the 2017-18 school year; 194 of these teachers found employment in another LEA. None were employed by a charter school.

⁴ 332 records were changed from "Moved to another LEA" (code 58) or "Moved to NC charter school" (reason code 70) to "Resigned for unknown reasons" (code 69) because no employment record was found in the 2017-18 school year.

Chart 1

State Attrition and Student Growth

In order to appreciate fully the impact of teacher attrition on the state, it is important to understand the relative effectiveness of the instruction of those who leave employment in NC public schools and those who remain. For the purposes of this report, teaching effectiveness is defined as the average EVAAS index score over a three-year period; and all available EVAAS scores within a three-year period (2014-15, 2015-16, and 2016-17 school years) are averaged. Where a teacher has fewer than three years of EVAAS data, the average among all available EVAAS index scores is used. Teachers without any EVAAS scores are excluded from this analysis. The EVAAS index score is a standardized measure of a teacher's impact on student achievement relative to the average NC teacher's impact in a particular grade/subject. Teachers with EVAAS index scores of zero are considered to have teaching effectiveness that is consistent with that of the hypothetical "average" NC teacher. For teachers with an EVAAS index score of 2.0 or greater, the state is confident that their instructional effectiveness exceeds that of the average NC teacher. For teachers with an EVAAS index score of less than -2.0, the state is confident that their instructional effectiveness is less than that of the average NC teacher.

On average, teachers who left employment in NC public schools had lower EVAAS index scores than those teachers who remained in employment during the measurement period. The average EVAAS index score for teachers who remained employed in NC public schools was 0.17 ($n=61,007$, $SD=2.38$); the average EVAAS index score for teachers who did not remain employed in NC public schools was -0.52

($n=5,204$, $SD=2.62$). The difference in EVAAS index scores (0.69) between these two groups is statistically significant ($t=19.95$, $p<0.001$).

While it is important to know that teachers who leave employment in NC public schools have, on average, lower EVAAS index scores, this analysis could mask important differences in teaching effectiveness for early-career versus more experienced teachers. By comparing the EVAAS index scores of departing and remaining teachers at differing levels of experience, one can determine whether the general trend holds true at various levels of teaching experience. In order to test this assumption, teachers were placed into five-year bands according to their years of experience (0-30 years). The EVAAS index scores of teachers who remained in employment were compared to teachers who left employment within the same band of experience. Table 3 contains data for the differences in EVAAS index scores for teachers who remained in NC public schools and those who left employment during the measurement period. From the display in Chart 2, one can discern that teachers who remain employed in NC public schools have higher EVAAS index scores, on average, than their counterparts with similar teaching experience who leave employment with NC public schools.

While this analysis confirms that teachers who departed from employment in NC public schools have lower EVAAS ratings than those who remained employed, one should not infer a causal relationship between EVAAS index scores and teacher attrition. While dissatisfaction with EVAAS or the teacher evaluation process might have played a part in teachers' decisions to leave NC public schools, no teacher expressly identified either measure as a reason for departing. Furthermore, the averages for each experience band contain many teachers with EVAAS ratings well in excess of 2.0. Many teachers with tremendous impact on student achievement elect to leave employment with NC public schools. In Chart 3, the percentages of teachers (both those who remained employed and left employment in NC public schools) in each of the EVAAS performance categories. While it is true that, on average, NC teachers who remained employed in NC public schools have a greater impact on student growth than their colleagues who choose to leave, there are many teachers who leave employment in NC public schools who have a positive impact on student growth. It is in the best interest of the state and LEAs to identify these teachers with positive impact on student growth and find ways to encourage them to remain employed in NC public schools.

Table 3: Differences in Average EVAAS Index Scores for Teachers who Remained in and Departed from Employment in NC Public Schools (n=66,211) 2016-2017

Years of Teaching Experience	Remain		Depart		Difference (Remain - Depart)
	n	Index	n	Index	
0-4 Years	16,834	-0.06	2,171	-0.68	0.62***
5-9 Years	11,490	0.24	868	-0.33	0.57***
10-14 Years	11,485	0.23	510	-0.49	0.71***
15-19 Years	9,475	0.24	379	-0.52	0.76***
20-24 Years	6,369	0.34	295	-0.50	0.84***
25-30 Years	3,770	0.36	549	-0.32	0.68***

*** indicates statistical significance at the $p<0.001$ level

Chart 2

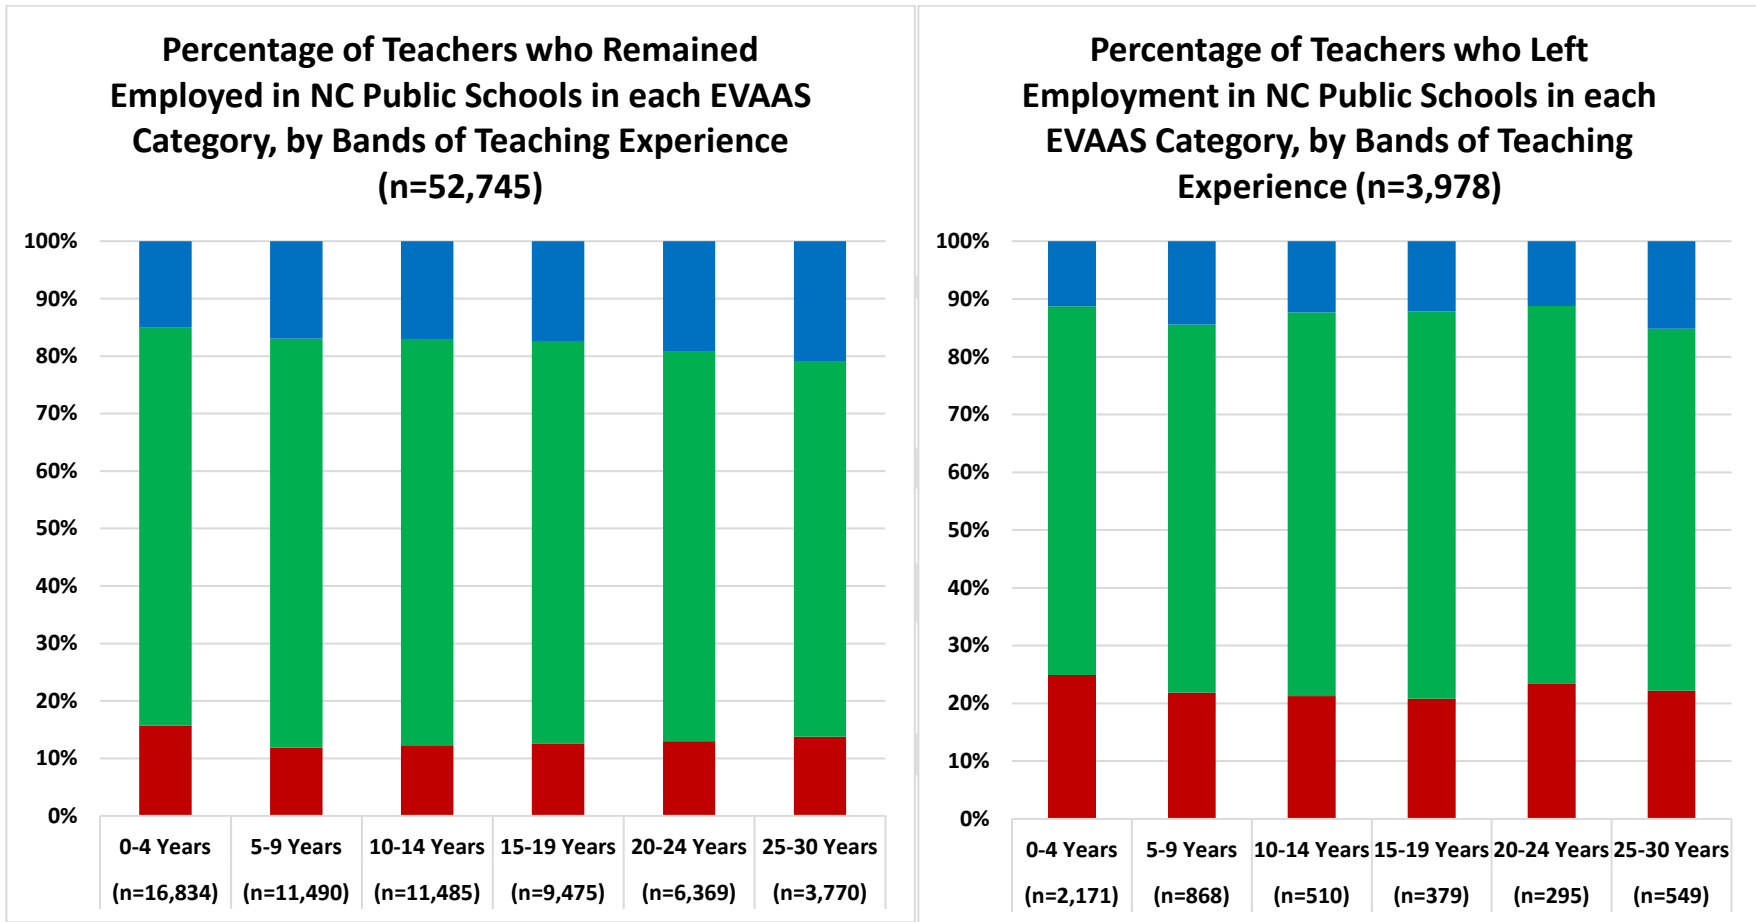

Chart 3

■ Exceeds Expected Growth
■ Meets Expected Growth
■ Does Not Meet Expected Growth

State Attrition by Region and LEA

The overall state attrition rate is a function of teachers leaving employment in NC public schools from the local employing agencies (LEAs). Certain LEAs may be more vulnerable to teacher attrition for a variety of reasons (e.g., proximity to neighboring states, proximity to or distance from a major urban center, employment opportunities outside of the education sector, etc.). These and other factors may create a differential effect on teacher attrition from NC public schools. In Table 5, the data show the contribution of the eight educational regions (and the Regional School) of North Carolina to the overall state attrition rate. These data indicate that, in general, regions in the western part of the state have lower teacher attrition rates than their eastern counterparts. The Northwest Region has the lowest attrition rate (6.4%) for teachers in the state; the Southeast Region has the highest rate (9.9%) among the state's regions. The Regional School does have a higher attrition rate than the Southeast Region, but it is a small school and is only included here to account for all the teachers leaving employment in NC public schools.

**Table 5: Contribution to the State Attrition Rate by Region (n=94,792)
2016-2017**

Region Name	Total Number of Teachers	Number of Teachers Leaving Employment in NC Public Schools	Attrition Rate by Region
Regional School	10	1	10.0%
North Central	23,004	2,037	8.9%
Northeast	5,016	446	8.9%
Northwest	5,744	370	6.4%
Piedmont Triad	16,181	1,306	8.1%
Sandhills	9,008	851	9.5%
Southeast	9,010	895	9.9%
Southwest	21,060	1,832	8.7%
Western	5,759	463	8.0%
State Totals	94,792	8,201	8.65%

While a state-wide attrition rate of 8.65% may be in line with attrition rates experienced by other professions, the state-wide attrition rate is not informative in terms of the effects of teacher attrition on individual LEAs. Data on the five LEAs with the highest and lowest attrition rates in the state are presented in Table 6. The LEAs with the highest teacher attrition rates are Weldon City Schools, Jones County Schools, Warren County Schools, Bertie County Schools, and Halifax County Schools. The attrition rate for these LEAs is highly variable and substantially greater than the overall state attrition rate. The attrition rate for Weldon City Schools (22.7%) is approximately 162% greater than the overall state attrition rate (8.65%). Halifax County Schools, with the lowest attrition rate of the five LEAs (14.8%), has a 71% higher attrition rate than the state as a whole.

Conversely, the LEAs with the five lowest attrition rates – Edgecombe County Schools, Alleghany County Schools, Elkin City Schools, Yancey County Schools, and Camden County Schools – have teacher attrition rates that are less than half that of the state attrition rate. Furthermore, the attrition rates for these five districts are roughly within one percentage point of one another (with the exception of Edgecombe County Schools). Although there are a myriad of factors specific to each of these ten LEAs that may affect their attrition rates, it would benefit all LEAs for the state to explore what factors might be contributing to the low attrition rates of these five districts. If there are programs, processes, or organizational structures present in these five LEAs that can be replicated (with similar effect) in other LEAs across the state, there might opportunities to lower the state's attrition rate even further.

It is important to note that these attrition rates for the LEAs are based solely on teachers who leave employment in NC public schools. Mobility rates, which also have an impact on the instructional capacity of LEAs, will be analyzed in the following section.

**Table 6: Five Highest and Lowest LEAs in State Attrition Rates
2016-2017**

LEA Name	Total Number of Teachers	Number of Teachers Leaving Employment in NC Public Schools	Attrition Rate by Region
Highest Attrition Rates			
Weldon City Schools	75	17	22.7%
Jones County Schools	96	17	17.7%
Warren County Schools	156	27	17.3%
Bertie County Schools	158	27	17.1%
Halifax County Schools	183	27	14.8%
Lowest Attrition Rates			
Camden County Schools	128	5	3.9%
Yancey County Schools	172	6	3.5%
Elkin City Schools	91	3	3.3%
Alleghany County Schools	120	4	3.3%
Edgecombe County Schools ⁵	383	0	0.0%

⁵ According to 2017-2018 payroll data, Edgecombe County Schools did have teacher attrition at the end of the 2016-17 school year, but those events occurred after the March 2016-March 2017 data collection.

Teacher Mobility

Up to this point, this report has focused on teachers who have left the teaching profession in North Carolina public schools. The 115 LEAs across the state must not only contend with the impact of teachers leaving state employment, but also the loss of teachers due to teachers changing employment from one LEA to another LEA or charter school. During the measurement period from March 2016 to March 2017, on average, 4.80% (4,549 teachers) of North Carolina's teaching force changed employment from one LEA to another LEA or NC public charter school. The combined effect of teacher attrition from public school employment and the mobility of teachers across LEAs results in the LEA attrition rate⁶. This section of the report will focus on how LEAs differ in terms of their mobility and overall attrition rates and whether there are informative trends in how teachers move from one LEA to another.

In Table 7, the five LEAs with the highest overall mobility rates and the five LEAs with the lowest overall mobility rates are displayed. Lexington City Schools reported the highest percentage of teachers moving to another LEA or charter school during the measurement period. Lexington City Schools' percentage of 15.9% is over three times the state average mobility rate. Similar to the attrition rates, the mobility rates of these five districts are large (relative to the average) and consistent in their magnitude (range of 3.1 percentage points).

The five districts with the lowest mobility rates in the state have mobility rates that range from 0% (Avery and Edgecombe County Schools) to about half (47.9%) of the state mobility average. Avery and Edgecombe County Schools stand out for having had no teachers leave the system to pursue employment elsewhere in the state (during the measurement window). As suggested earlier in this report, it may be beneficial for the state to examine these districts more closely to determine what policy-relevant factors may be contributing to these low mobility rates.

**Table 7: Five Highest and Lowest LEA Mobility Rates
2016-2017**

LEA Name	Total Number of Teachers	Number of Teachers Leaving LEA	LEA Mobility Rate
Highest Mobility Rates			
Lexington City Schools	207	33	15.9%
Northampton County Schools	137	20	14.6%
Thomasville City Schools	171	24	14.0%
Washington County Schools	115	15	13.0%
Vance County Schools	494	63	12.8%
Lowest Mobility Rates			
Camden County Schools	128	3	2.3%
Graham County Schools	90	1	1.1%
Dare County Schools	379	4	1.1%
Edgecombe County Schools	383	0	0.0%
Avery County Schools	168	0	0.0%

⁶ Teachers who reported that they were leaving employment with NC public schools but appeared in payroll records in the 2017-18 school year were not included in state-level attrition rates. If these teachers appeared in the payroll records of a different LEA/charter school after March 2017, they factor into the original LEA's mobility rate. If the teacher appeared in the payroll records of the same LEA in March 2016 (regardless of role), they do not factor in the LEA's mobility rate.

Overall Attrition from the LEAs

The combined effect of attrition from the state and mobility from the LEA results in the overall LEA attrition rate – the percentage of instructional capacity an LEA loses during the measurement period of March 2016 to March 2017. The state average for the LEA attrition rate is 13.45%: 8.65% for attrition from the state and 4.80% for average mobility rate. The ten LEAs that demonstrate the five highest and five lowest LEA attrition rates are displayed in Table 8.

From the data contained in Table 8, one can see that Weldon City Schools and Warren County Schools experienced the greatest percentage of loss to their teaching force during the measurement period. Weldon City Schools lost approximately one of every three teachers employed in the system during the measurement period. The remaining LEAs of the high attrition rate group lost, on average, more than one in four of their teachers from March 2016 to March 2017. The high rates of attrition among these five LEAs undoubtedly creates challenges for the LEAs to maintain consistency in instructional services for their students. It should be noted that Halifax and Northampton County Schools, which exhibited the highest LEA attrition rates in the 2015-2016 measurement period have substantially reduced their LEA attrition rates (Northampton – 32.9% in 2016, 27.0% in 2017; Halifax – 35.0% in 2016, 26.8% in 2017).

In the 2015-2016 report, LEAs from the western part of the state represented four of the five LEAs with the lowest LEA attrition rates. In the 2016-2017 report, one can see that LEAs from the eastern part of the state have entered the lowest five LEAs in LEA attrition rates – Edgecombe County Schools, Camden County Schools, and Dare County Schools. Avery and Ashe County Schools are the two LEAs from the western part of the state that demonstrated very low LEA attrition rates (0.0% and 5.8%, respectively). These five LEAs have overall attrition rates that range from 0% to 47% of the average LEA attrition rate for the entire state. Avery County Schools, in particular, appears to be well protected against losing teachers either to another state or to other NC LEAs. Avery County Schools is the only LEA to be in the lowest five LEAs for LEA attrition in the 2015-2016 and 2016-2017 reporting years. Other data sources relevant to teacher satisfaction (e.g., the NC Teacher Working Conditions Survey) might hold valuable information for our understanding of how these five districts are able to retain their teachers at rates that are much higher than the state average.

**Table 8: Five Highest and Lowest Total Attrition Rates for LEAs
2016-2017**

LEA Name	Total Number of Teachers	Number of Teachers Leaving State Employment	State Attrition Rate for LEA	Number of Teachers Leaving LEA	LEA Mobility Rate	Total Number of Teachers Departing from the LEA	Total Attrition Rate from LEA
Highest LEA Attrition							
Weldon City Schools	75	17	22.7%	7	9.3%	24	32.0%
Warren County Schools	156	27	17.3%	16	10.3%	43	27.6%
Washington County Schools	115	16	13.9%	15	13.0%	31	27.0%
Northampton County Schools	137	17	12.4%	20	14.6%	37	27.0%
Halifax County Schools	183	27	14.6%	22	12.0%	49	26.8%
Lowest LEA Attrition							
Dare County Schools	379	20	5.3%	4	1.1%	24	6.3%
Camden County Schools	128	5	3.9%	3	2.3%	8	6.3%
Alleghany County Schools	120	4	3.3%	3	2.5%	7	5.8%
Avery County Schools	168	8	4.8%	0	0.0%	8	4.8%
Edgecombe County Schools	383	0	0.0%	0	0.0%	0	0.0%

LEA Recoupment Rate

Although teacher mobility can present challenges to LEAs in staffing their schools and maintaining instructional consistency, the movement of teachers across the state can benefit some LEAs. LEAs may benefit from teacher mobility by being able to replace departing teachers with other teachers who have experience with NC curricula, assessment practices, and other state policies and procedures. In order to appreciate the net effect of teacher mobility on the LEAs, one must understand how well LEAs are able to capitalize on teacher mobility to replenish their teaching forces. In this report, the rate at which LEAs are able to attract teachers who are changing employment within the state and offset their own losses is referred to as the LEA recoupment rate. The recoupment rate is the number of mobile teachers who appear on an LEA's payroll on or after March 2017 divided by the total number of teachers who left that LEA during the measurement period.

From the data in Table 9, one can observe the recoupment rates of the LEAs with the five highest, and lowest, teacher recoupment rates during the period from March 2016 to March 2017. Tyrell County Schools and Camden County Schools enjoyed the highest rate of replacing their departing teachers with teachers who have teaching experience in North Carolina (75%). Many of the LEAs in the top five of teacher recoupment rates had relatively small numbers of departing teachers, so it might be easier for these LEAs to achieve higher recoupment rates than larger LEAs. One notable exception to this trend is Orange County Schools. Orange County Schools was able to replace 49 of its 78 teachers who departed the LEA during the measurement period, for an overall recoupment rate of 62.8%. The strategies that this moderate-sized LEA used to replace its teacher losses with experienced NC teachers may be a fruitful area of inquiry.

Low rates of teacher recoupment pose challenges for LEAs. If an LEA is unable to leverage teacher mobility within the state to offset its own losses, the LEA must hire teachers that are either new to the profession or new to teaching in North Carolina. Initially, both groups of teachers – new to the profession

and new to teaching in NC – are, on average, less effective than teachers with experience in North Carolina. LEAs with low recoupment rates will generally have to invest more resources and support for these teachers without previous experience in North Carolina. Of the five LEAs with the lowest rates of recoupment, Swain County Schools was able to replace only one of its departing teachers with a teacher who had prior experience in NC. Halifax County Schools had the fifth lowest recoupment rate among LEAs (8.2%). Halifax County Schools' recoupment rate is doubly problematic given that it is the only LEA that had one of the highest LEA-attrition rates in the state combined with one of the lowest recoupment rates. The state may need to recognize and support LEAs like Halifax County Schools that have high attrition rates and low rates of teacher recoupment.

A complete list of LEAs with their attrition, mobility, and recoupment rates can be found in Appendix C.

**Table 9: Five Highest and Lowest Total Recoupment Rates for LEAs
2016-2017**

LEA Name	Number of Departing Teachers	LEA Attrition Rate	Teachers Employed from other LEAs	Recoupment Rate
Highest Recoupment Rates				
Tyrrell County Schools	8	16.7%	6	75.0%
Camden County Schools	8	6.3%	6	75.0%
Orange County Schools	78	14.2%	49	62.8%
Avery County Schools	8	4.8%	5	62.5%
Clinton City Schools	18	8.9%	10	55.6%
Lowest Recoupment Rates				
Halifax County Schools	49	26.8%	4	8.2%
Granville County Schools	81	16.4%	5	7.4%
Bertie County Schools	41	25.9%	3	7.3%
Vance County Schools	115	23.3%	8	7.0%
Swain County Schools	23	15.9%	1	4.3%

LEA Attrition Data for Low-Performing Districts

One of the requirements of this report is to examine the rates of attrition and mobility for the LEAs that were identified as low performing in the 2016-2017 school year. There were eleven LEAs identified as low performing in the 2016-2017 school year: Thomasville City Schools, Washington County Schools, Edgecombe County Schools, Public Schools of Robeson County, Kannapolis City Schools, Anson County Schools, Halifax County Schools, Nash-Rocky Mount Schools, Hertford County Schools, Northampton County Schools, and Elizabeth City-Pasquotank County Schools. The attrition, mobility, and recoupment rates for these eleven LEAs are presented in Table 10.

The data from these eleven LEAs show that there was great variability in the LEA-attrition rates. Four of these LEAs (Halifax, Northampton, Thomasville City, and Washington) had LEA-attrition rates that were approximately twice the state average of 13.45%. On the other hand, Edgecombe County Schools and the Public Schools of Robeson County saw teacher departure rates (0.0% and 11.7%, respectively) that were less than the state average. The remaining LEAs had LEA-attrition rates that was consistent with the state average.

These eleven LEAs do not appear to exhibit a recoupment rate that is markedly different from other LEAs across the state. Two LEAs showed a recoupment rate that exceeded the state average of 27.9% - Nash-Rocky Mount Schools and Elizabeth City-Pasquotank Schools. Halifax County Schools showed higher than average attrition rates from the LEA, but its recoupment rate was below 10% (8.1%). For Halifax County, this means that more than 90% of the teachers it hired for the 2017-18 school year were either new to the teaching profession or new to the State of North Carolina.

There does not appear to be a strong association between teacher attrition, mobility, and recoupment rates and designation as a low-performing district. With the exception of Halifax County Schools, these districts do not demonstrate a consistent departure from state averages on the three measures of teacher attrition, mobility, and recoupment.

Seven of the eleven LEAs that were identified as low-performing in the 2016-17 school year, were also on the list of low-performing districts in the 2015-16 school year (Anson, Kannapolis, Nash-Rocky Mount, Northampton, Robeson, Thomasville City, and Washington). There is no clear, observable trend in the attrition and recoupment data for these LEAs from the 2015-2016 reporting period to the 2016-2017 reporting period. Some of the LEAs fared better in terms of attrition and recoupment rates and some exhibited higher attrition and lower recoupment rates. There is nothing in the data to suggest that attrition or recoupment rates for these LEAs suffer as a result of their low-performing designation.

Table 10: Attrition, Mobility, and Recoupment Rates for LEAs Identified as Low Performing 2016-2017

Row Labels	Total Number of Employees	State Attrition	State Attrition Rate	Mobility	Mobility Rate	Total Number Departed	LEA Attrition Rate	Recoup	Recoup Rate
Anson County Schools	226	31	13.7%	21	9.3%	52	23.0%	7	13.5%
Edgecombe County Schools	383	0	0.0%	0	0.0%	0	0.0%	0	---
Halifax County Schools	183	27	14.8%	22	12.0%	49	26.8%	4	8.2%
Hertford County Schools	195	24	12.3%	10	6.1%	34	17.4%	4	11.8%
Kannapolis City Schools	372	21	5.6%	33	8.9%	54	14.5%	13	24.1%
Nash-Rocky Mount Schools	947	79	8.3%	68	7.2%	147	15.5%	42	28.6%
Northampton County Schools	137	17	12.4%	20	14.6%	37	27.0%	5	13.5%
Elizabeth City-Pasquotank County Schools	394	32	8.1%	32	8.1%	64	16.2%	18	28.1%

Thomasville City Schools	171	22	12.9%	24	14.0%	46	26.9%	10	21.7%
Washington County Schools	115	16	13.9%	15	13.0%	31	27.0%	4	12.9%

Most Difficult to Staff License Areas

Prior to the 2016-2017 State of the Teaching Profession Report, NCDPI surveyed LEAs about the most difficult to staff licensure areas. For this year's report, the agency is taking a different approach to answering this question. Instead of asking the LEAs their impressions of which licensure areas are hardest to staff, NCDPI has asked districts to report on teacher vacancies on the first and 40th instructional day of the 2017-18 school year. Conducting the analysis in this manner will allow the agency to ground the result in data rather than the perceptions of recruiters in the LEAs.

In order to ensure that all LEAs reported their data in a consistent manner, it was necessary to create a teacher vacancy definition. For the purposes of this report, NCDPI defined a teacher vacancy as an instructional position (or a portion thereof) for which there is not an appropriately licensed teacher who is eligible for permanent employment. Instructional positions that are filled with long-term substitutes, retired teachers, or provisionally licensed teachers would be counted as vacant by the LEA, because these employees are not lasting solutions to the vacancy issue and are only stop-gap measures (in most cases) employed by the LEA until a full-time, permanent, fully-licensed teacher can be found. Because of the Department's approach to defining teacher vacancy, one should not assume that positions listed as vacant lack a teacher, but that the position is being covered by the best possible interim teacher until the LEA can realize a more appropriate solution.

For the 2017-18 school year, LEAs across the State of North Carolina reported a total of 103,631.3 teaching positions in North Carolina. This report includes data from 107 LEAs and one report from the North Carolina Department of Prisons. Eight LEAs' data were omitted from the analysis due to inconsistencies in the data – Ashe County Schools, Asheville City Schools, Bertie County Schools, Dare County Schools, Davie County Schools, Madison County Schools, Thomasville City Schools, and Winston Salem-Forsyth County Schools. LEAs were asked to report the number of teaching vacancies on both the first and the 40th instructional day of the 2017-18 school year. Across the state there were 1562.3

(1.5%) instructional vacancies on the first day of the school year and 1555.0 (1.5%) vacancies on the 40th instructional day. In many cases, the positions that were reported as vacant on the first instructional day were different from the positions that were reported as vacancies on the 40th instructional day. This suggests that teacher vacancy is a continual issue that LEAs must contend with throughout the school year.

In Table 11, one can see the total number of vacancies in the state for selected subject areas by school type (elementary, middle, and high school). It is clear that elementary schools have the greatest number of vacancies in the selected subject areas, but that is expected given that there are far more elementary schools than middle or high schools. While these numbers may appear small for state-wide totals, one must bear in mind that each vacancy represents a classroom of students that does not have a certified, permanent teacher as of the 40th instructional day. With nearly of a quarter of the school year complete by the 40th instructional day, there will likely be a negative effect on the academic achievement of the students in these classrooms.

Table 11: State-Wide Total Vacancies for Subjects by School Type

Subject Area	School Type	Number of Vacancies
Core (Math, ELA, Science, Social Studies)	K-5	234.0
Exceptional Children	K-5	129.3
Math	6-8	66.7
ELA	6-8	51.5
Science	6-8	42
Social Studies	6-8	24.5
Exceptional Children	6-8	58
Math	9-12	94.5
ELA	9-12	38
Science	9-12	49.5
Social Studies	9-12	35
EC	9-12	71.6
CTE	9-12	69.6

LEAs varied considerably in their vacancy rates across the state. There were 12 LEAs that reported zero teaching vacancies on the 40th instructional day – Tyrell, Graham, Clay, Perquimans, Alleghany, Swain, Yancey, Clinton City, Cherokee, Transylvania, Macon, and Buncombe. The top five LEAs, in terms of teacher vacancies on the 40th instructional day are presented below in Table 12. The vacancy totals for all selected subject areas and vacancy rates for each LEA are presented in Appendix D.

Table 12: LEAs with the Highest Teacher Vacancy Rates in North Carolina

LEA Name	Teacher Vacancy Rate
Anson County Schools	11.8%
DPS Education Services (formerly Division of Prisons)	9.8%
Hyde County Schools	9.7%
Elizabeth City-Pasquotank Schools	9.3%
Martin County Schools	8.0%
Craven County Schools	7.3%

Conclusions and Next Steps

In general, North Carolina teachers continue to remain teaching in the state and their respective LEAs. While the state attrition rate of 8.65% may be comparable with the attrition rates of other professions, this report has demonstrated that there is substantial variation in that rate across the 115 LEAs in the state. Additionally, analysis of the effectiveness of teachers who no longer remain employed in NC public schools shows that departing teachers are, on average, less effective than their counterparts who choose to remain employed in NC public schools. The question of whether the teachers that replace those teachers lost through attrition are as effective remains unanswered.

Teachers transferring between LEAs, while not representing a loss for the state, do have an impact on the instructional capacity of North Carolina’s public school systems. While some LEAs are able to capitalize on teacher mobility, others experience teacher mobility as another obstacle to maintaining a strong, experienced teaching force. Clearly, there are LEAs that are more effective than others at guarding against teacher attrition through mobility. Similarly, some LEAs are able to replenish their diminished teaching force by attracting the state’s mobile teachers to their schools. Research into these two phenomena could prove beneficial to the state in terms of reducing teacher mobility in LEAs that experience the highest rates of teacher mobility.

Finally, this report examined the license areas that were most difficult for LEAs to find teaching candidates. Surveys from a majority of the state’s LEAs show that there is a dearth of teachers licensed in the areas of mathematics and elementary education. Finding teachers who are licensed in the area of Exceptional Children also continues to be a challenge for the state’s LEAs.

The findings in this report are preliminary and should, in no way, suggest a causal relationship between teacher attrition and other characteristics of teachers or LEAs. If any relationships borne out by the analyses in this report suggest a shift in policy or practice, it is advisable that the state conduct deeper, more thorough, research into the possible root causes of the reported relationships. Such research can only enhance our understanding of why, and under what circumstances, teachers decide to leave the teaching profession in North Carolina or move from one LEA to another.

Appendices

Appendix A: Self-Reported Reasons for Leaving

Teachers who left the LEA but remained in education (Includes individuals resigning to teach in another NC LEA or charter school and individuals who moved to non-teaching positions in education)	
58	Resigned to teach in another NC public school system
	Teachers leaving LEA to accept a teaching position in another NC system
	Teachers leaving LEA to accept a teaching position in a NC charter school
	Teachers obtaining another teaching job on their own initiative (as opposed to spouse relocation)
59	Moved to a non-teaching position in education in another LEA or Agency
	Teachers moved to counselor, media coordinator, or non-teaching duties in another LEA or Agency
	Teachers moved to administrative positions (school-based) in another LEA or Agency
	Teachers moved to supervisory, director, or coordinator positions in another LEA or Agency
	Teachers accepted non-teaching support or administrative positions in another LEA or Agency
70	Resigned to teach in a NC charter school
	Teachers leaving LEA to accept a teaching position in a NC charter school
	Teachers obtaining another teaching job on their own initiative (as opposed to spouse relocation)
71	Resigned to teach in a NC non-public/private school
	Teachers leaving LEA to accept a teaching position in a NC non-public/private school
	Teachers obtaining another teaching job on their own initiative (as opposed to spouse relocation)
75	Moved to a non-teaching position in the LEA
	Teachers moved to counselor, media coordinator, or non-teaching duties in current LEA of employment
	Teachers moved to administrative positions (school-based) in current LEA of employment
	Teachers moved to supervisory, director, or coordinator positions in current LEA of employment
	Teachers accepted non-teaching support or administrative positions in current LEA of employment
Teachers who left for personal reasons (Includes individuals retiring with reduced benefits, individuals resigning to teach in a non-public school in NC, individuals resigning to teach in another state, individuals dissatisfied with teaching, individuals seeking a career change)	
57	Resigned – Family responsibility/Child care
	Teachers resigning for maternity/family leave
	Teachers resigning to care for ill parents or members of the immediate family
	Teachers resigning to care for family business or personal needs
60	Resigned – To continue education/Take a sabbatical
	Teachers resigning to return to school
	Teachers resigning to pursue an educational leave of absence
61	Resigned – Family relocation
	Teachers resigning due to spouse's relocation
	Teachers resigning as a result of marriage and relocation
	Teachers resigning due to family relocation
62	Resigned – To teach in another state
	Teachers leaving NC to teach in a public school in another state
	Teachers leaving NC to teach in a private school in another state
63	Resigned – Dissatisfied with teaching
	Teachers resigning due to dissatisfaction with teaching
64	Resigned – Health/disability
	Teachers resigning due to personal disability or health related issues
68	Retired with reduced benefits
	Teachers retiring after age 50 with reduced benefits
	Teachers retiring with less than full benefits
72	Resigned – Career Change
	Teachers resigning to pursue another employment opportunity
	Teachers resigning to pursue interests outside teaching

73	Re-employed Retired Teacher Resigned
	Teacher who had retired, was re-employed and subsequently resigns
Teachers whose departure was initiated by the LEA (Includes individuals who were non-renewed, dismissed, or resigned in lieu of dismissal)	
50	Dismissed
	Teachers demoted or dismissed under GS 115C-325(h)
	Probationary teachers dismissed during the school year under GS 115C-325(m)
	Teachers dismissed under GS 115C-325 (Below standard ratings)
	Teachers reported to the dismissed teacher list
	Teachers dismissed and the ruling upheld by case manager
53	Non-Renewed – Probationary Contract Ended
	Probationary teachers whose contract is not renewed after the end of the year
54	Interim Contract – Not Rehired (<i>Report only for interim contracts of 6 months or more</i>)
	Interim teachers not rehired under retirement cap
	Teachers not rehired under a term contract with specific employment dates
	Teachers not rehired due to return of a permanent teacher from a leave of absence
55	Resigned in lieu of dismissal
	Teachers resigned to avoid placement on dismissed teacher list
	Teachers resigned rather than go through full dismissal hearing
	Teachers resigned during an active investigation regarding performance/behavior as a professional educator
56	Did not obtain or maintain license
	Teachers not renewed due to failure to fulfill lateral entry requirements
	Teachers not renewed due to failure to earn 15 renewal credits
	Teachers failed to meet Praxis or provisional license requirements
	Teachers let license expire
	Teachers' license was revoked
78	Resigned In Lieu of Non-Renewal
Teachers who left for reasons beyond LEA control (Includes individuals who retired with full benefits, individuals who resigned for health reasons, individuals who resigned due to family responsibilities and/or childcare, death, and individuals who resigned due to family relocation)	
51	Reduction in Force
	Teachers not rehired due to loss of enrollment, funding, or programming
	Teachers covered under local "RIF" policies
66	Retired with full benefits
	Teachers age 60 with 25 years of creditable service
	Teachers with 30 years of creditable service
	Teachers age 65 with at least 5 years of creditable service
	Teachers retiring with full/unreduced retirement benefits
67	Deceased
	Teachers who die while in active service in a NC public school
74	Resigned – End of Visiting International Faculty (VIF) Term
	Teachers whose cultural visas have expired and are no longer eligible to be employed in North Carolina
76	Resigned – Moving Due to Military Orders
	Teachers resigning due to being moved under military orders
77	Resigned – End of Teach for America (TFA) Term
Teachers who left for other reasons (Includes teachers resigning or leaving teaching for reasons not listed or those who resigned for unknown and other reasons)	
65	Resigned – Other reasons
	Teachers resigning or leaving teaching for reasons not listed on the survey
	<i>Please specify (text box):</i> _____
69	Resigned – Reasons unknown
	Teachers resigning; however, there is no information on reason

**Appendix B: State Attrition Percentages by Reasons Categories for LEAs
2016-2017**

LEA Code	LEA Name	Total Teachers	Teachers Leaving	Personal Reasons	%	Initiated by LEA	%	Beyond Control of LEA	%	Other Reasons	%
010	Alamance-Burlington Schools	1562	130	69	53.1%	13	10.0%	21	16.2%	27	20.8%
