

## **March 20202 SBOE Meeting -- Standards Review Update**

The Georgia Department of Education, under the leadership of Superintendent Woods, as well as the Governor's Office have been solely focused on supporting districts and schools during the COVID-19 crisis.

As with other state programs and initiatives, the current K-12 mathematics standards review has been placed on pause so GaDOE staff can focus on supporting districts and schools in continuing distance learning opportunities and Georgia's mathematics educators can focus on supporting their students and colleagues.

In partnership with the Governor's Office, Superintendent Woods will reevaluate and revise the standards review timeline and reconvene committees as necessary once our state has gotten through this challenging time.
