Managed Dark Fiber IRU, 10-year lease

Per USAC, dark fiber is not considered a telecom service, and is not subject to USF. Today for lit networks, this is a 31.8% additional cost overhead (with the FCC proposed First Quarter 2021 USF Contribution Factor at 31.8%). Please weigh this cost savings for dark fiber as part of your cost effectiveness assessment. The contingent dark fiber pricing contained in this proposal requires the award of all sites to Sonic.
