SRCS COVID-19 Status

Handbook

Proposed Revisions

Handbook Concerns

- Remove
 - “stable classroom cohorts”
 - “Limit participation in group activities and gatherings with mixed households.”
 - “Participation in multiple stable groups should be minimized. A stable group is a group of children who stay together to minimize COVID-19 exposure by limiting cross-over. Examples include elementary school class, aftercare, youth sports club, recreational class. Your household and transportation group (e.g., bus) are not considered stable groups.”
 - Plan for school closures.....

Notable Clarifications

- Volunteers may begin to work in the school setting adding “Fully Vaccinated” status and must follow all Covid safety protocols, status to the existing Fingerprint, and TB test requirements.
- Siblings without symptoms do not need to be removed from school if one sibling demonstrates symptoms.
 - If a sibling does show a confirmed positive, then all siblings must be quarantine and are not eligible for a “modified quarantine due to being in a “unmasked environment”
- **Revise**
 - Modified Quarantine Program:
 - Not Eligible:
 - Students in “unmasked situations” e.g. home, community, lunch
 - Eligible
 - Students in a “masked” setting
 - No symptoms
 - Must test twice weekly
 - May not participate in extracurricular activities includes athletics, but can in childcare
 - Exempt from Quarantine
 - Vaccinated individuals that remain asymptomatic
 - Individuals that have previous experienced a positive covid exam in the last 90 days

Continued Notable Exceptions

- Consult with a healthcare professional for testing recommendations if new symptoms develop.

I think or know I had COVID-19, and I had symptoms

You can be around others after:

- 10 days since symptoms first appeared **and**
- 24 hours with no fever without the use of fever-reducing medications **and**
- Other symptoms of COVID-19 are improving*

**Loss of taste and smell may persist for weeks or months after recovery and need not delay the end of isolation*

Note that these recommendations **do not** apply to people with severe COVID-19 or with weakened immune systems (immunocompromised).

Table 1. K-12 School-based Testing Options

Questions for Consideration	Keeping Track of COVID-19	Preventing Outbreaks of New Cases via Screening	Responding to School Outbreaks**	Helping Keep Kids in School
What is the COVID-19 rate in your community?	Low community case rates* No active community outbreaks	Moderate, Substantial or High community case rates* Active community outbreaks or increasing community rates	Any community case rates	Any community case rates
When might schools consider this option?	To reassure and support members of the school community and/or To track case rates in schools for decision-making	To prevent outbreaks in schools where there are higher community case rates	There is an active outbreak occurring in the LEA	To provide on-site access to testing for those with symptoms or close contacts of cases, to limit missed school days with a modified quarantine†

Keeping Track of COVID-19 (lower case rates in the community) - periodic testing of a portion of unvaccinated asymptomatic staff and students to understand school rates of COVID-19

Preventing Outbreaks of New Cases via Screening (higher case rates or outbreaks in the community) - screening testing for all unvaccinated people at high frequency (weekly or twice weekly) in order to prevent inschool transmission and prevent an outbreak on campus.

Responding to School Outbreaks (might happen at low or high community case rates) - testing unvaccinated close contacts in a school outbreak, to find any potentially asymptomatic infectious individuals who should isolate at home to prevent infecting others.

Helping Keep Kids in School (symptom testing and testing to modify quarantine) * - testing students and staff with symptoms, and testing to modify quarantine for unvaccinated close contacts as described in the CDPH K-12 schools guidance.

	Appropriate Test Types	Population Tested	Frequency of Testing
Keeping Track of COVID-19	Pooled PCR in elementary schools with reflex antigen or PCR** Antigen Lab-based PCR	At least 10% of elementary classrooms And/or At least 10% of all unvaccinated staff and students	Pre-entry testing once before school begins, and consider after school breaks and/or Adaptive approach: weekly, every 2 weeks, or monthly, adapting if in school or community case rates shift*
Preventing Outbreaks of New Cases via Screening	Pooled PCR in elementary schools with reflex antigen or PCR** Antigen Lab-based PCR	All unvaccinated students and staff	Weekly or twice weekly testing

	Appropriate Test Types	Population Tested	Frequency of Testing
Responding to School Outbreaks	Lab-based PCR Antigen on-site Rapid molecular tests (PCR-like)	All exposed unvaccinated students and staff All symptomatic students and staff, regardless of vaccination status	Testing of all exposed unvaccinated people at beginning of quarantine and to modify quarantine if appropriate for the outbreak
Testing Symptomatic People and to Modify Quarantine	Lab-based PCR Antigen on-site or at home Rapid molecular tests (PCR-like)	Staff or students with symptoms, regardless of vaccination status and/or Unvaccinated students or staff who are close contacts, to remain in school for a modified quarantine†	As needed

Discussion of Weekly Testing of Staff

State Public Health Officer Order of August 11, 2021

All schools identified in this Order must verify vaccine status of all workers.

- A. Asymptomatic **unvaccinated** or incompletely vaccinated workers are **required to undergo** diagnostic screening testing.
- B. Workers may be tested with either antigen or molecular tests to satisfy this requirement, but unvaccinated or incompletely vaccinated workers must be tested **at least once weekly** with either PCR testing or antigen testing.
- C. Unvaccinated or incompletely vaccinated workers must also observe all other infection control requirements, and are not exempted from the testing requirement even if they have a medical contraindication to vaccination, since they are still potentially able to spread the illness.
- D. Schools with workers required to undergo workplace diagnostic screening testing should have a plan in place for tracking test results and conducting workplace contact tracing, and must report results to local public health departments.

Order of the Health Officer of the County of Sonoma C19-27 Effective 9-24-21

Testing Logistics: Staff

- Vendor “Color” as the provider
- District “Team” to provide PCR nose swab tests to school sites weekly
- Staff will self-administer the nose swab and return to collection receptacle at site
- District Team will collect and bring to Lewis facility for Lab Pick up
- 3-4 day turnaround

Staff Testing & Mandatory Vaccinations: Options for the Board

Required:

- All Staff (workers) must inform the District of their Vaccination status. No information considered as not vaccinated.
- Unvaccinated Staff must be tested weekly

Options for Consideration:

- Random Testing of Vaccinated Staff
- Voluntary Testing of Vaccinated Staff
- Required testing of Vaccinated Staff at Work
- Required testing of Vaccinated Staff may provide proof of test
- Required for all Staff to be vaccinated (strict medical exemptions)

Considerations for All Staff Weekly Testing and Vaccinations

- Staff may object to undergo weekly testing and resign or apply for leave
- Costs associated with Weekly Staff Testing still undetermined (\$21 per test is currently published w/o health provider reimbursement)
 - For all Employees $\$21 \times 1,800 \times 13 \text{ weeks} = \$491,400$
 - For Unvaccinated 40% unvaccinated $\$21 \times 721 \times 13 = \$196,833$

Questions from the Board:

- Vaccinations
- Testing
- Masking

Discussion of Weekly Testing of Students

Testing Logistics: Students

- State contracted Vendor “Ginkgo” provides kits and some staff
- Students will be scheduled to self-administer a nasal swab once per week
- Teachers will “assist” the weekly student nasal swabbing collection
- Staff will provide “pooled” testing kits to each classroom based on a schedule for students to self administer
- Staff will collect “pooled” kits and provide them to a courier for lab analysis
- Any “pools” that show one positive, we be re-tested with a “rapid “ based test for immediate quarantine

Testing Logistic Analysis

Student Testing & Vaccinations: Options for the Board

Required:

- No student testing required, guidance on models noted previously
- No vaccination available <12
- No state guidance on required student vaccinations for COVID-19

Recommendations

- SCDHS recommend Screening Testing Weekly for all Students

Options for Consideration:

- Random Testing of students
- Voluntary Testing of students
- Rapid Symptomatic Testing of Students
- Required weekly Screening Testing for all students.
- Required testing of Vaccinated Students provide proof of test

Considerations for Weekly Testing of Students

Variations of “required” Weekly Student Screening Tests

1. Required to be taken at school, no opt out provision
2. Required, no opt out, but parents can show weekly proof of lab-based testing
3. Recommended with opt in consent

Age Range	Consent	Results Reporting
<13	Parent Consent Required	Parent only
13-17	Parent Consent possible, but not necessary	Student by default, parent can be added
>= 18	No parental consent	Student only

Student Masking

Required:

- Current implementation of Students and Staff wearing a mask when in the presence of others

Options for Consideration:

- Continue the current implementation with mask wearing outdoors “Strongly Recommended.”
- Require masks of students and staff at ALL times including outdoors, unless eating.

Considerations for All Student Weekly Testing and Mandatory Vaccinations

- Undetermined # of Families would remove themselves and move to AB 130 Ind. Study
- Possible lawsuit for mandating vaccinations or testing and costs associated with that.
- Concerns about capacity of AB 130 Ind. if many families move out of In-person learning, due to increases in enrollment
- Costs of Temporary Staff to administer the testing program
- Costs associated with “loss of time” of existing classified staff to assist in testing program administration.

Questions from the Board:

- Vaccinations
- Testing
- Masking

Of Note:

Current vaccination guidance includes school “workers” includes volunteers and individuals that “work” at school events.

- With the exception of “single type” instances of parents or visitors such as IEPs, parent conferences etc...all other volunteers, team drivers, snack bar workers who come to any SRCS campus will required to show proof of full vaccination status, or participate in weekly staff testing.
