To Whom it May Concern:

It is my pleasure to write this letter and express our satisfaction with N1C and their portfolio of products. New Albany-Floyd County Schools began the process upgrading and standardizing our UPS infrastructure nearly two years ago. One of our primary goals with this project was to implement Li-ion units to utilize their superior power density and performance to weight ratio. We quickly found the existing Li-ion portfolio of the incumbent vendors in the market to be lacking. N1C units were ultimately selected due to their broad product portfolio, 10-year warranty, integrated network management card, and competitive pricing.

Over the past two years we have integrated dozens of units from across N1C's portfolio, including N1C.LR series units in our data centers and N1C.L series units in our building IDFs and maintenance closets. All units have performed without issue during this time. Our building technicians have especially appreciated the ease of implementation due to the lower unit weight and the reduction in routine maintenance versus traditional Lead-Acid UPS units.

If you have any further questions, please feel free to reach out.

Sincerely,

Christopher J. Bowers
