No changes recommended.

The Clarke County Board of Education believes that the education of our students is a responsibility that is shared by the school district staff, parents and the community at large. It is the policy of the Board to endorse and support efforts which lead to broadening the decision-making process at the system as well as building levels. Better decisions result when a broad spectrum of individuals with related interests are informed on issues and are represented in the decision-making process. It is further the policy of the Board of Education that each school may establish appropriate shared decision-making committees, councils, or teams.
